ABSTRACT

This program is designed to harness the resources of eight colleges and universities, 13 public school districts, 17 parochial and independent schools, three teacher and administrator organizations, and the Cleveland Commission on Higher Education and to direct them towards the improvement of preservice and in-service teacher education through the special facilities and programs of a network of 32 teacher education centers in Greater Cleveland. Four metropolitan-wide support systems were designed for a) training, b) information exchange and resource sharing, c) computer-based questionnaire feedback, and d) evaluation. These systems are operating in 1972-73 in direct support of school and college teams in each center. Included in this report as illustrations of the work of the project are program goals and, among the appendixes, illustrations of training material and activities, illustrative descriptions of one center in each of the five major types of centers, computer-based feedback questionnaires, and a system and membership roster. (Author/JA)

THE GREATER CLEVELAND TEACHER EDUCATION CENTERS COOPERATIVE SUPPORT PROGRAMSUMMARY

ED 076521

This program is designed to harness the resources of eight colleges and universities, 13 public school districts, 17 parochial and independent schools, 3 teacher and administrator organizations and the Cleveland Commission on Higher Education and to direct them toward the improvement of pre-service and in-service teacher education through the special facilities and programs of a network of 32 teacher education centers in Greater Cleveland.

Following eight years of collaborative study focused on student teaching, the centers began to emerge in 1970. Their structures and programs are each nearly unique, reflecting the characteristics and needs of the school and college partners. Some of the centers in Greater Cleveland involve several schools handling up to 30 student teachers at a time while others are limited to 4 or 5 students in a department of one school at a given time.

A Greater Cleveland Teacher Education Centers Coordinating Committee comprising representatives of each center designed four metropolitan-wide support systems for (1) training, (2) information exchange and resource sharing, (3) computer-based questionnaire feedback, and (4) evaluation. These systems are operating in 1972-73 in direct support of school and college teams in each center.

The centers provided field experiences for 400 student teachers in 1971-72 and approximately 900 student teachers are expected in 1972-73. A three-year foundation grant provides funding for TECCC staff and support systems design and initial operation. This program has resulted in the establishment of a collaborative rather than competitive posture among the many schools, universities, and colleges operating in Greater Cleveland.

THE GREATER CLEVELAND TEACHER EDUCATION CENTERS COOPERATIVE SUPPORT PROGRAM

A Case Study of A Program to Develop a Metropolitan Network of Teacher Education Centers in Greater Cleveland, Ohio

Introduction

John Carroll University has been designated as the submitting agent for this program even though it represents the combined efforts of the following institutions in Greater Cleveland: Baldwin-Wallace College, Case Western Reserve University, Cleveland State University, John Carroll University, Kent State University, Notre Dame College, Saint John College, and Ursuline College.

In addition, the Cuyahoga County School Superintendents' Association (representing Superintendents from 34 area public school systems), the Cleveland Teachers Union, the Northeast Ohio Teachers Association, the Catholic Schools of Greater Cleveland, and several independent schools have been active participants in various aspects of the program.

The case study is intended to reflect the sum total of the involvements of all these institutions and agencies rather than to describe their individual involvements. Thus, the case study describes a collaborative teacher education effort on the part of many institutions, agencies, and schools in this metropolitan setting.

Origins of School-College Cooperation

In 1964, the Cleveland Commission on Higher Education (representing all of the colleges and universities in Cuyahoga County, Ohio, with teacher education programs) conducted a study entitled, "Toward Improved Teacher Education in Greater Cleveland." Among its recommendations, the study-team suggested a number of ways to improve student teaching experiences. To precipitate action on these recommendations the Commission organized a consortium of local schools and

CATION POSITION OR POLICY

colleges to examine and suggest ways to strengthen student teaching programs. These initial activities, known as the Student Teaching Improvement Project, were supported by a research grant from the United States Office of Education. Through this funding, a three-year program of research, innovation and evaluation in improving teacher education was initiated. This effort created a firm base for cooperation among area colleges of education, school systems and communities in improving student teaching in particular and teacher education in general.

Teacher Education Centers Conceptualized

Toward the end of the Student Teaching Improvement Project, those involved realized that the establishment of teacher education centers offered one of the most direct positive means for improving the educational experiences of student teachers as well as in-service programs for school faculties through the bridging of resources of the colleges and school systems in cooperative ventures. Furthermore, these planners determined that the teacher education centers in Greater Cleveland would develop most satisfactorily through a metropolitan-wide cooperative relationship among schools and colleges. This perspective came at a time when the teacher education center concept was being recognized on the national level by the Association of Teacher Educators, The American Association of Colleges For Teacher Education and the United States Office of Education. In 1970, Dr. Raymond A. LeGrand (of John Carroll University) produced an initial working-paper, "A Conceptual Model for Teacher Education Centers in Cleveland." LeGrand and his colleagues from other area colleges and school systems listed several objectives which served as starting points for local schools and colleges to begin to transform their conventional student teaching activities by incorporating some of the characteristics of centers.

A Variety of Centers Emerge

In 1970 and 1971, five modest planning grants were made to various pairings of schools and colleges who pledged to enter into serious partnership negotia-

tions. Simultaneously, a number of unfunded pairings also developed. Over 32 centers are now developing in the Greater Cleveland area. These centers are characterized by a variety and a diversity in their organization and operation, including the basic decision-making process, the educational experiences offered the student teachers, and the specific use of all center personnel. Five general types of centers have emerged so far: (1) Multi-institutional/Multi-School; (2) Multi-institutional/Single School, (3) Single Institution/Multi-School, (4) Single Institution/Single School, and (5) Single Institution/Single Department (within a school). (Brief descriptions of examples of each of these types of centers are included in the Appendix A). This diversity of type, structure, processes and programs is a major strength of the centers in Cleveland. Indeed, during the early development of the centers, each assumed different configurations to better serve the needs of the cooperating schools and colleges.

Establishment of TECCC

The original conceptual model for this network of teacher education centers proposed the establishment of a Greater Cleveland Teacher Education Centers Coordinating Committee (TECCC). TECCC was established in May 1970 with one representative and an alternate from each cooperating center to exchange information and share experiences among the various centers. (See Appendix B for Operating Guidelines). Through this exchange of information and resources, several center commonalities began to emerge from the seemingly diverse centers: (1) A deliberate reordering of the resources of the colleges and schools to provide the best educational experiences and expertise to students, (2) an internal decision-making process which permits the participation of all center personnel (school and college), (3) a team concept in which the student teachers can learn from, and share experiences with, each other and with more than one school

person, (4) an emphasis on providing innovative experiences for the student teacher and other students in clinical field experiences, (5) a physical location--in many cases an entire school or several schools--serving as a nucleus and conceptual focal point for the center activities, and (6) the designation of a center coordinator who assumes a crucial role in the center by maintaining the validity of the student teacher experience while also determining and seeking to fulfill the educational in-service needs of the center staff.

Metropolitan-wide Support Systems

The Greater Cleveland Teacher Education Centers Coordinating Committee has further identified common needs in the areas of training, information and resource sharing, and feedback and evaluation. To accommodate these needs, TECCC established Task Forces in 1971-72 and in 1972-73 to design and implement the following metropolitan-wide support systems for the centers: (1) a training support system which focuses on pre-service and in-service training (including the orientation of school administrators and college faculties, (see Appendix C for examples of training activities), (2) an information and resource sharing system to permit the maximum utilization of human and other resources (see Appendix D for examples), (3) a computer-processed questionnaire feedback system to permit the monitoring of student teacher and cooperating personnel attitudes, expectations, and experiences in the centers (see Appendix E), and (4) an evaluation study to determine the degree to which student teachers achieve their expectations for training more fully in the center experience than in traditional settings (see Evaluation below). The focus of all support efforts is the strengthening of the Center Team which is the embodiment of school-college partnership.

Program Goals and Action Steps for 1972-73

The major thrust for 1972-73 concentrates on the teacher education centers movement as the most significant breakthrough promising to bridge the efforts of colleges and schools in improving the quality of education in the classrooms in Greater Cleveland. The most significant element in the center concept is the school-college partnership which underlies its unique nature.

This school-college partnership manifests itself in what might be called a "center Team". The "Center Team" is defined as all those persons--school personnel, and students--who are operationally part of teacher education center activities including planning, implementing and/or evaluating. The program goals of the TECCC for 1972-73 concentrate on the further development of the existing 32 center teams as well as new center teams which might be created.

The Table below outlines the specific objectives and strategies to implement these goals as well as the evidence which would be accepted as proof of accomplishment.

.....

Program Goal 1: To establish specific organizational mechanism is to ensure that the development of teacher education centers continues as a viable movement after June 1973.

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|--|---------------|--|-------------------------------|
| 1. TECCC meeting to review and adopt goals and specific action steps for 1972-73. | Sept. 30 | Approved statement of Program Goals and Action Steps for 1972-73 | TECEC and whole TECCC |
| 2. Update TECCC membership list | Oct. 15 | Membership Roster | Ed Fox/CCOHE |
| 3. Confirmation of TECEC membership and officers. | Sept. 30 | Affirmative action | TECCC |
| 4. Develop initial long-range TECCC organizational proposal. | Nov. 1 | Proposal document | TECEC |
| 5. Review of TECCC organizational proposal by collaborating groups: TECCC, ED. COM., CCSSA, CCOHE, with responses and recommendations. | Dec. 15 | Receipt of responses from all groups | TECCC, ED. COM., CCSSA, CCOHE |
| 6. Set up new TECCC structure. | May 1, 1973 | Adoption by collaborating parties of revised proposal. | TECCC, ED. COM., CCSSA, CCOHE |

Program Goal #2: To establish a Training System to meet Team Education Center Teams' needs and meet specific center personnel needs.

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|---|----------------|--|--|
| A. To establish a core of trained resident trainers in Greater Cleveland: | | | TECEC |
| 1. Review and adopt training proposal to train resident trainers for TEC movement.. | Sept. 21 | Action to approve proposal | |
| 2. Identify and secure commitments for training from potential trainers. | Oct. 31 | Letters of commitment | CCOHE Staff |
| 3. Conduct training program for trainers. | Jan 1, 1973 | Training completed | Training consultants |
| 4. Schedule Training Workshops in Centers for center team personnel. | Mar. 1, 1973 | Schedule and letters of commitment received | TECCC Task Force on Training |
| 5. Implementation of Training Workshops. | April, 1973 on | Workshops Completed | Trainers and TECCC Training Task Force |
| B. To respond to immediate training needs of center personnel: | | | TECEC, Sally Wertheim and Jerry Graham |
| 1. Set up TECCC training task force | Sept. 30 | Task Force Members committed | TECCC Training task force |
| 2. Identify priority training needs in centers requiring metropolitan-wide action. | Sept. 30 | Task Force Report | TECCC Training task force |
| 3. Set up interim strategies to deliver training resources, leadership, materials, etc. | Nov. 1 | Roster of resource persons committed to provide training resources and schedule of activities in centers | TECCC Training task force |
| 4. Implementation of special training activities. | Nov.-June | Completed training activities | TECCC training task force and resource persons |

Program G: #3: To implement an Information System to support teacher education center teams.

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|---|------------------|-----------------------------------|--|
| A. To implement an information/directory system: | | | |
| 1. To complete identification of most important information which center personnel and planners need. | Sept. 30 | Outline of Report Forms | Ed Fox with TECCC Information System Task Force |
| 2. To complete data collection instruments. | Oct. 15 | Completed instruments | Ed Fox with consultant |
| 3. Gathering of data. | Nov. 1 | Returned data forms | Ed Fox with TECCC task force |
| 4. Process, publish data. | Dec. 1 | Published directories and reports | CCOHE staff |
| B. To implement a data feedback system: | | | |
| 1. Revision of feedback questionnaires to provide data to center teams regarding the effectiveness of their experiences. | Oct. 15 | Revised questionnaire forms | Dave McCrory and TECCC Feedback System Task Force |
| 2. Implementation of Feedback System (questionnaires to student teachers, cooperating teachers, and center coordinators). | Dec. 1 and May 1 | Reports sent to each center | TECCC Task Force on Feedback System (Dave McCrory) |

Program Gc #4: To conduct evaluation activities which will assist the TECCC and Teacher Education Center Teams improve the center programs.

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|---|---------------|---|--|
| A. To provide center teams and others with analysis of the effectiveness of center programs compared to traditional student teaching programs. | | | |
| 1. Select Researchers. | Oct. 15 | Contract | CCOHE Staff |
| 2. Preliminary design drawn up. | Nov. 15 | Design statement | Researchers |
| 3. Approval of design and instruments. | Dec. 1 | Accepted Design | CCOHE Staff, Pat Cosiano, TECEC |
| 4. Gathering Data. | Dec./Jan. | Completed and returned data gathering instruments | Researcher and Respondents |
| 5. Publish preliminary report. | Feb. 1 | Report document | Researcher |
| 6. Review design and data gathering. | Mar. 1 | Accepted Design modifications/additions | CCOHE Staff, Pat Cosiano, TECEC |
| 7. Gather Data. | April/May | Completed instruments | Researcher and Respondents |
| 8. Publish Final Report. | July 1 | Final Report Document | Researcher and CCOHE staff |
| B. To provide center teams and others with information which would facilitate their comparing their own center activities with other alternatives:* | | | |
| 1. Catalog aspects and elements in the centers structure and activities which center personnel identify as most in need of testing or evaluating. | Oct. 15 | List of concerns | Pat Cosiano and TECCC task force on Evaluation |

Program Goal #4: To conduct evaluation activities which will assist the TECCC and Teacher Education Center Teams improve the center programs. (continued)

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|--|---------------|----------------------------|--|
| <p>2. (TECCC Task Force to complete list of Action Steps on Sept. 30).</p> <p>*In addition to feedback system information discussed under program Goal #3, Item 3 and 4.</p> | Sept. 30 | Completed list | Pat Cosiano and TECCC Task Force on Evaluation |

Program Goal 5: To stimulate new school-college partnerships through the establishment of additional Teacher Education Centers in Greater Cleveland.

| Action Steps | Deadline Date | Evidence of Accomplishment | Who is Responsible |
|---|----------------|--|--|
| 1. Introduction of TEC Workshop Kit for the development of new centers. | Sept. 30 | Brochure distributed | Creative Learning Systems and CCOHE |
| 2. Conduct workshops with new faculties and potential center team personnel. | Oct. 1 - May 1 | Workshops completed | College personnel, Ed Fox, C.L.S. personnel as requested |
| 3. Provide consulting specialists who can respond to requests from school or college personnel for help in interpreting the center ideal, develop plans for new centers, etc. | Dec. 1 | Personnel Information Directions published (requests processed) | CCOHE office and TECEC |
| 4. To gain a commitment from several colleges and universities to the idea of a multi-institutional TEC in the inner-city. | March, 1973 | The establishment of a T.E. Center Team to draw up explicit center plans | Edna Stinson, Task Force of TECEC and representatives of the Cleveland Public Schools. |

Personnel and Statistics

The Greater Cleveland Teacher Education Centers Coordinating Committee is comprised of 64 voting members (including alternates) and 56 associate members (see 1972-73 Roster in Appendix F). An Executive Committee of five members and a full-time Executive Secretary provide the administrative structure. Personnel who comprise center teams in cooperating centers approximate 325 school staff and approximately 50 college staff. Some 400 student teachers completed their field experiences in centers in Cuyahoga County in 1971-72. Approximately 900 student teachers are expected to complete their field experience in the 32 cooperating centers during 1972-73.

The 32 centers involve partnerships between 6 colleges and universities* working with 39 schools in 13 separate public school systems and 17 parochial and independent schools in Cuyahoga County. *(See Note page 16).

Budget

Staff support for the activities of TECCC is provided by a full-time professional housed in the Cleveland Commission on Higher Education who acts as Executive Secretary to the Committee. A \$48,000 grant to the Commission from the Martha Holden Jennings Foundation of Cleveland provides the budget for TECCC activity. This grant covers the Executive Secretary, secretarial and office support, and funds to contract for the development and initial implementation of the training, evaluation, and information-sharing systems which were outlined above. Over the three-year period the foundation grants have totalled \$112,600. While support from this source will end in June 1973, TECCC is investigating alternative forms of support including the resources available through the participating institutions and schools.

Evaluation Procedures

A continuing emphasis is placed on monitoring the attitudes, expectations and experiences of center personnel and student teachers. The computer-based

questionnaire feedback system has been operationalized to provide reports to each center and to the cooperating teacher education institution at least twice each year. Each center receives a report summarizing its data plus a report giving total metropolitan data. (see 1971-72 samples and a Summary Commentary in Appendix E). Thus each center can compare its own participants' feedback with the perceptions of participants in all centers.

As a special effort the committee is sponsoring an independent testing of the following hypothesis in 1972-73:

"Student teachers whose clinical training has taken place in teacher education centers in Greater Cleveland perceive themselves as reaching a higher level of accomplishment of their student teaching expectations than do their classmates whose clinical training has taken place in the more traditional mode."

Two samples of 100 student teachers each, one from centers, and one from non-center schools, will be asked to indicate their expectations for their student teaching experience during the first week of student teaching. In the last week they will be asked to rate their degree of accomplishment toward these goals. These data will be used to test the above hypothesis as well as to yield other comparative conclusions.

The instrumentation is being designed currently by an ad hoc committee working with the Executive Secretary. (Not available until approximately December 1, 1972). The sampling design, field testing and refinement of the instrument, administration, analysis and reporting of the data have been contracted to an independent research agency in Cleveland. A comprehensive report on the effectiveness of centers is planned for June 1973.

TECCC Support Program Contribution to Teacher Education

The Cooperative Support Program of TECCC has contributed to the development and support of the teacher education center movement in the Greater

Cleveland area in a number of ways. Most importantly its goal is to establish a collaborative, rather than a competitive posture among schools, universities and colleges. As detailed above and in the Appendix material its contributions have included or will include in the near future:

1. Developing materials, both descriptive and supportive to help new centers get under way; (e.g., an introductory workshop kit was produced to promote in-depth school-college center planning).
2. Providing human resources, both project staff and teacher education center staff, to help new centers and to help developing centers bridge difficult growth periods on their way to mature programs.
3. Evaluating existing teacher education center programs in order to test the efficacy of the teacher education center movement.
4. Providing training to teacher education center personnel at all levels (college, public school teachers and administrators) in skill areas that center personnel have requested; (e.g., instructional techniques, human relations, conferencing, and motivational and planning techniques).
5. Providing advice and support to institutions desiring to form new center relationships.
6. Initiating and operating an information and resource sharing system to promote effective utilization of scarce talent and other resources on a metropolitan-wide basis.
7. Arranging and coordinating meetings, conferences, and workshops where information is dispersed, authorities are made available and dialogue among the diverse groups occurs.
8. Providing opportunities for representatives of different groups to work together toward the solution of common problems through task forces made up of many different types of people from the various institutions, schools and agencies.
9. Providing for dissemination of ideas to other groups working to establish teacher education centers in other areas than Cleveland. For example, demonstrations of materials and information were given at the ATE Teacher Education Center Clinics in Atlanta and Charleston in 1972. Members of the Teacher Education Center Coordinating Committee were available to discuss the Cleveland program.

10. Furnishing materials at the request of individuals in schools and colleges outside of Cleveland. Several staff reports have been submitted to the ERIC Information System (see supplementary material).
11. Promoting a partnership concept in which school personnel have contributed directly to the redesign of elements of the teacher education program in several of the cooperating colleges and universities.

In addition to the forementioned very tangible contributions, the TECCC program has made equally important intangible contributions to teacher education in Greater Cleveland. It is presently the only metropolitan-wide program involving school and college, public and private, professionals working in an equity partnership. This dialogue among college-based teacher educators and school-based teacher educators is possible because of the open representation on the TECCC. (Appendix B). It used to be that when one met with colleagues on rare occasions at professional meetings in distant cities, empty suggestions would be made about the need to dialogue on a regular basis in Cleveland. The TECCC program has caused this to happen on neutral ground around common interests. It has provided a program of activities through which unique and often diverse sets of partners can be supported, enhanced and allowed to cooperate toward common goals.

To achieve the level of trust necessary for effective cooperative efforts among so many diverse independent institutions and school agencies is indeed difficult. The TECCC program is in the process of doing this. To say the program has been completely successful would be an exaggeration. To say it has taken important steps toward improving teacher education through a joint effort involving over thirty-five independent institutions and systems would be an honest assessment. Viable and exciting school/college partnerships have happened in Greater Cleveland. The TECCC program supports these and demonstrates a model that other communities might be able to adopt to achieve these goals in similar ways. It is expected that more teacher education centers will be added to this Greater Cleveland network. Each will represent a genuine partnership between schools and colleges for ongoing

professional education personnel development. Through all of the apparent diversity of the various teacher education centers, there is a basic unifying goal... the willingness to cooperate and use innovative approaches to improve the quality of teacher education.

Note: Notre Dame College and Ursuline College do not operate centers at this time. They have, however, placed students in centers operated by other partners and have been fully involved in the TECCC and its developing support programs since its inception.

Centers Coordinating Committee

Appendix A

On the following pages are illustrative descriptions of one center in each of the five major types of centers.

I. Multi-Institutional/Multi-School

Beachwood Elementary Center (John Carroll University-Kent State University)

Three elementary schools in Beachwood comprise the center. One of the principals is the coordinator for the program. University supervisors from Kent State and John Carroll Universities are developing broad relationships with the faculties of the three schools, all of whom are considered staff for the center.

Field work students and student teachers (called associate teachers) are considered integral members of the teaching faculty and are expected to provide specific instructional capabilities.

Both team-teaching (in an open concept setting) and self-contained classroom instructional settings are provided. Student teachers indicate in writing their expectations for their experiences and their placements are arranged accordingly. Student teachers are encouraged to experience both lower and upper elementary instruction. Each student teacher also works with the special area teachers (Physical Education, Reading, etc.).

Student teaching-related seminars are conducted by both university and school system personnel at the center.

The center is only in its first year of operation. The policy and program-determining structure to embrace the school personnel and both universities is in the formation stage. Both universities have indicated their desire to move forward cooperatively in the venture. Over 60 field experience students and student teachers will utilize the center in 1972-73.

II. Multi-Institutional/Single School:

THE **teacher education center**
AT
BEACHWOOD MIDDLE SCHOOL
beachwood, ohio

BEACHWOOD MIDDLE SCHOOL
2860 Richmond Road
Beachwood, Ohio 44122
464-2600

Hello:

In recent months, many educators concerned with teacher education have expressed interest in the Teacher Education Center at Beachwood Middle School. Many questions have arisen from our discussions, and we offer them here, along with our answers.

We hope that you will recognize that our Center is not intended to be a model. This booklet may, however, help illustrate the attempt of one school/university consortium developed to significantly improve the professional growth of teachers.

Sincerely,

David L. McCrory
Coordinator Teacher Education

WHAT IS A TEACHER EDUCATION CENTER?

Physically, it is a field site for professional education for both preservice and inservice teachers. Conceptually, a Center is a cooperative arrangement between a school and one or more universities. The overriding purpose of a Center is for the institutions to share human and material resources to improve teaching.

HOW WOULD YOU DESCRIBE THE BEACHWOOD MIDDLE SCHOOL TEACHER EDUCATION CENTER?

The Beachwood Middle School Teacher Education Center is a multi-university consortium for teacher training. The field site is an open-space, team-teaching school for grades 6-8. Teacher education students from the cooperating universities participate in the school in a variety of roles. Teachers from the school use the resources available at the universities.

WHAT INSTITUTIONS ARE INVOLVED IN YOUR CENTER?

John Carroll University; The Cleveland State University; and, Kent State University are partners in our Center.

IS THE TEACHER EDUCATION CENTER A NEW CONCEPT?

Schools and universities around the country have for some time had working relationships for student teaching. There is, however, an increased interest now in expanding such cooperative ventures to include all types of preservice and inservice work.

IS YOUR FIELD SITE AN EXPERIMENTAL SCHOOL?

Beachwood Middle School is not experimental. It is different from conventional programs in conventional buildings. We attempt to use innovative staffing patterns and a wide variety of resources, but these are hardly experimental.

ARE OTHER SCHOOLS IN THE BEACHWOOD DISTRICT INVOLVED AS TEACHER EDUCATION CENTERS?

Yes, the three elementary schools and the high school are also serving as Centers.

WHAT ARE SOME OF THE ADVANTAGES TO SCHOOLS THAT YOUR TEACHER EDUCATION CENTER PROVIDES?

The most obvious advantage to schools is an improved adult-to-child ratio. But there are other benefits such as access to services of the universities. Teachers also gain a better sense of partnership with teacher training personnel in the universities.

WHAT ARE THE ADVANTAGES TO SCHOOL CHILDREN?

By bringing the interests of universities into the schools, children benefit from the increased talents and resources they provide for teachers.

DOES EACH TEACHER EDUCATION STUDENT WORK WITH A TEACHER WHO HAS THE SAME SUBJECT MATTER SPECIALTY?

The option to spend most of one's time with a single team member exists. We find, however, that field students often choose to work with several specialists, particularly in related areas such as math and science.

HOW ARE FIELD-WORK STUDENTS EVALUATED?

Self-evaluation by the field student is encouraged, plus input from each staff member who works with the student. Summative evaluation at the end of a college term is done by consensus, with the Coordinator resolving any conflicting judgments.

WHAT RIGHTS DO STUDENT TEACHERS HAVE IN YOUR CENTER?

The question of "student rights" is coming under scrutiny on all levels. Associate Teachers are afforded the same responsibilities and privileges of certified teachers except those of a contractual nature.

WHAT ARE THE MIDDLE SCHOOL STUDENTS' ATTITUDES TOWARD STUDENT TEACHERS IN YOUR CENTER?

In most cases, children see field work students as adults who are members of a teaching team. Differences in experience and interests are sometimes obvious, as they are with certified teachers.

IS THE ROLE OF THE UNIVERSITY SIGNIFICANTLY CHANGED IN YOUR CENTER?

Yes. The university's responsibility for teacher education is shifted from a focus on preservice to a focus on inservice training. This has meant that each university must relinquish some of the control it has traditionally had over teaching apprenticeships.

WHO SETS THE POLICIES FOR THE OPERATIONS OF THE CENTER?

Representatives from each of the universities meet regularly with school representatives to establish policies for the TEC. University students and school teachers are included as members of that representative body, called the Task Force for Teacher Education.

HOW DO YOU IDENTIFY WHERE THE JURISDICTION OF THE SCHOOL BEGINS AND THAT OF THE UNIVERSITY STOPS?

That is the focus of continuous exploration. At present, decisions directly affecting the universities are made through the Task Force for Teacher Education. University representatives are members of that group. Decisions concerning field work students, but not directly affecting the university programs, are made through normal school decision-making procedures.

HOW DID YOU GET YOUR CENTER STARTED?

John Carroll University and the Beachwood City Schools initially proposed that the two institutions combine resources for education of teachers. Kent State University and The Cleveland State University also showed interest. The Cleveland Commission on Higher Education then provided funds for the development of the idea, and the Center was born.

IS THE CENTER NOW SUPPORTED BY SPECIAL FUNDING?

No. The Center is financed out of normal operating costs.

HOW MANY FIELD WORK STUDENTS DO YOU HAVE IN YOUR CENTER?

The number varies from term to term, but on the average we have about 20 Associate Teachers and approximately 10 pre-student teaching persons.

ARE STUDENT TEACHERS WHO WORK IN THE BEACHWOOD MIDDLE SCHOOL
PREPARED FOR TEACHING POSITIONS IN CONTEMPORARY SCHOOLS?

Our field work students have many of the same experiences that trainees in other schools have. For example, they plan instructional units and activities, keep records of pupil progress, and maintain order.

There are many additional experiences, however, such as team decision-making, individual counseling, and large group (100) instruction. It is the additional experiences which we believe help prepare teachers for a variety of educational settings, including contemporary schools.

IS THE RESPONSIBILITY FOR PROVIDING INSERVICE EDUCATION FOR
TEACHERS DIFFERENT IN A TEACHER EDUCATION CENTER?

Inservice education is no longer seen as the sole responsibility of the school. Rather it is shared with the universities, just as responsibility for preservice education is shared.

WHAT KIND OF INSERVICE EDUCATION DO YOU PROVIDE FOR TEACHERS?

With the cooperation of member universities, teachers may participate in a variety of workshops, seminars, conferences, and courses designed to improve their professional competence. Opportunities are provided both in school and on campus on an individual basis and for teams of teachers.

WHAT DOES THE STUDENT OF TEACHER EDUCATION GAIN FROM WORKING
IN YOUR CENTER?

There are two major advantages. First, working and studying in the same school with peers results in a sharing and clarifying of experiences. Second, field work students come into contact with many teachers who provide alternative models of teaching behavior.

DO STUDENT TEACHERS ATTEND SEMINARS ON CAMPUS OR AT THE CENTER?

We provide a variety of educational opportunities for student teachers, seminars being one type. Other professional growth experiences include such options as attending teacher workshops, using self-instructional materials, and observation/interviews with school personnel.

WHAT ARE THE ADVANTAGES TO UNIVERSITIES INVOLVED IN YOUR CENTER?

University resources, both human and material, are better utilized. For those purposes that are best accomplished in a field setting, the Center is easily accessible. A single Coordinator, for example, can provide more direct guidance for more field students in a Center.

HOW ARE FIELD WORK STUDENTS ASSIGNED TO YOUR CENTER?

The Center Coordinator assigns field work students to teaching teams in accordance with the needs and wants of the school and the students. Many subtleties are also considered, such as personality, special skills, and the prior experience of persons involved.

WHO MAKES DECISIONS ABOUT WHAT FIELD WORK STUDENTS WILL DO IN YOUR CENTER?

The Coordinator assigns field work students, supervises field experiences and develops inservice education activities for teachers. He serves as a liason between the school and the universities.

IS YOUR CENTER COORDINATOR BASED IN THE SCHOOL OR UNIVERSITY?

In the school. Immediate help for field students is available for resolution of instructional or human relations difficulties.

WHAT ARE SOME OF THE FUNCTIONS THAT TEACHER EDUCATION STUDENTS SERVE IN YOUR CENTER?

Depending upon their goals and their readiness, college students observe, teach, type, test, counsel, plan and perform a variety of schooling functions.

IS IT POSSIBLE THAT SOME FIELD WORK STUDENTS IN YOUR CENTER MIGHT HAVE QUITE DIFFERENT EXPERIENCES FROM OTHERS?

Yes, we often plan it that way. We have found no one set of experiences that is appropriate for every teacher-in-training.

HOW ARE "COOPERATING TEACHERS" SELECTED?

In our Center, every adult in the school is a potential Cooperating Teacher. By virtue of being assigned to a teaching team in an open school, field students work with many individuals. Such a variety of talent, skills, and experience provides for modeling of the best in each person.

WHAT DO YOU DO IN THE EVENT OF A PERSONALITY CONFLICT BETWEEN A TEACHER AND A FIELD WORK STUDENT?

With field work students assigned to a team rather than an individual, we do not often have this problem. When it does occur at a critical level, we simply change the field student's assignment to another team of teachers.

IS THE BEACHWOOD MIDDLE SCHOOL TEACHER EDUCATION CENTER INTENDED TO BE A MODEL CENTER?

It is intended to be an alternative to conventional field experience arrangements in teacher education.

WHERE CAN I GET MORE INFORMATION ABOUT THE BEACHWOOD MIDDLE SCHOOL TEACHER EDUCATION CENTER?

Appendix A-3

III. Single Institution/Multi-School

NOTE: The enclosed description date 1971-72 includes two centers operated by Bowling Green State University which are no longer operational. The two Kent State University Centers have merged into one center with four schools for 1972-73. The basic rationale for the program remains substantially as stated herein.

THE NORTH OLMSTED

TEACHER EDUCATION CENTERS

Appendix A-4

The North Olmsted Centers - A Rationale and Description

Educators across the country from pre-school through graduate school are concerned with the inequities and failures of traditional education at all levels of instruction. New organizational patterns, better staff utilization, new curriculum structures, new understandings of today's children and how they learn, as well as an appreciation of the changing role of the teacher are being proposed as means of improving education. The momentum for such change is underway; however, this momentum will have little impact until teacher education is changed.

University and public school cooperation toward improved teacher education is imperative in redefining the role and concept of the teacher. One of the more recent and most promising developments in the effort to improve both pre-service and in-service education is the creation of Teacher Education Centers. The center concept offers a unified approach to the study of teaching with a multitude of options which can be built into the program. Planned jointly by the university and public schools, the center can be designed to serve the needs and interests of the experienced professional as well as those of the pre-service or student teacher. An individualized approach in teacher education would make it possible for every teacher to learn in accordance with his own particular stage of professional development.

Appendix A-5

Organizationally, a Teacher Education Center is a grouping of two or three elementary schools, or one or two junior high schools and a senior high school within a school district, working in cooperation with a university. North Olmsted will have four centers underway in September, 1971. They include:

Kent State University
in cooperation with
Chestnut Elementary and Spruce Elementary

Bowling Green State University
in cooperation with
North Olmsted Junior High and North Olmsted Senior High

Kent State University
in cooperation with
Butternut Elementary and Coe Elementary

Bowling Green State University
in cooperation with
Birch Elementary and Fine Elementary

College Supervisors
Kent - Joan Kise
Robert McMurray
Bowling Green - Robert Hohman

All of the centers are in their early developmental stages. Each has a college supervisor whose basic responsibility is the pre-service education of the students assigned to him. Working closely with the university supervisors are the building principals, supervising teachers, and curriculum coordinators.

Although still in its infancy, the Teacher Education Center is proving to have many benefits. Evaluation by schools and universities which have participated in Teacher Education Centers for the past two to three years validates the merits of the center approach as it has begun in North Olmsted. In some cases control groups have been set up in an effort to measure the differences between center and non-center student

Appendix A-6

teachers. The results of these studies indicate a significant difference in the attitudes and teaching performance of the two groups. The center students participated more widely in the total school program, used a greater variety of instructional approaches, had better attitudes toward change and innovation and elicited and accepted more pupil responses than did the non-center group.¹

Some specific advantages of the North Olmsted program are reflected in the following statements:

1. North Olmsted offers new organizational patterns, different staff utilization plans, new and traditional facilities, and a variety of other experiences directed toward improved education.
2. By providing the student teacher the opportunity to work cooperatively with many faculty members, he is exposed to a variety of models as opposed to a single style of teaching.
3. Working as a part of a team offers an environment for creativity and innovation.
4. Different types of experiences are offered with each center giving each student a chance for intensive work and extensive observation in each setting.
5. Student teaching can be individualized when the school and the university work in close association for the benefit of the pre-service teacher.
6. Student teaching can be more enjoyable and productive when more people are involved.
7. Seminars can be run within the center rather than returning to the university.
8. Students can be given the opportunity to experience the ingredients of a (nongraded) continuous progress school.

¹ "The Teacher Education Center: A Unifying Approach to Teacher Education," a report from the Office of Laboratory Experiences, College of Education, University of Maryland, 1968. P. 5.

Appendix A-7

9. Students will gain confidence working at times independently and at other times in close association with other professional and student teachers.
10. Center students can participate more widely in the total school program through a diversity of experiences.

The Greater Cleveland Student Teaching Improvement Project lists some major benefits to the university. They include the following points:²

1. The quality of pre-service education will be improved.
2. The university will be assured of an on-going corps of cooperating teachers who continually grow more proficient as teachers and teacher trainers.
3. The role of the college supervisor becomes much more meaningful and worthwhile.
4. Cooperation among universities, colleges and schools will be strengthened.
5. The planning and assigning of field experiences and student teaching experiences can be regularized and simplified.
6. The gap between theory and practice will be decreased.

The advantages of the center approach to public schools are also reflected in the Greater Cleveland Student Teaching Improvement Project.

They are:

1. Schools will be assured of a constant supply of student teachers to aid in the process of individualizing instruction.
2. Better new and experienced teachers should result from this affiliation.
3. Public school personnel will be given a role in the pre-service decision making process.
4. The infusion of new ideas from colleges, cooperating centers and consultants will be of benefit to all concerned.

² LeGrand, Dr. Raymond A. "A Conceptual Model: The Satellite Teacher Education Center," The Greater Cleveland Student Teaching Improvement Project, Issue #8, June, 1970.

Appendix A-8

5. Help in recruiting new professional faculty will be available.

Immediate Needs of the North Olmsted Centers

The greater part of the 1971-72 school year will probably represent a settling-in period of the pre-service phase of the Teacher Education Centers. Teachers who would like to participate in the program need to be identified and helped to establish their roles within the centers. College supervisors will be in the process of redefining their tasks. Basic operational procedures need to be established at each center. Hopefully additional centers will be added or present centers will be expanded to include all schools within the North Olmsted system.

Although each center will have its own unique qualities, there is much to be gained by working together. It is in this light that the following recommendations are made:

1. That the Superintendent of Schools, along with university representatives, appoint a committee responsible for the coordination and developmental leadership of the North Olmsted projects.
2. That this committee work in association with the Cleveland Commission on Higher Education and STIP (Student Teacher Improvement Project) in order to avoid duplication of effort as well as to strengthen the unified approach to teacher education.

Future Development of the Centers

Kent State University and the North Olmsted Schools have received a \$1200 STIP grant to further the development of these centers. How this money will be spent and to what degree and purposes the centers develop remain to be seen.

Appendix A-9

Among the more significant questions to be discussed and answered in the area of pre-service education are:

1. To what degree will these centers work toward the restructuring of teacher education?
2. Can teacher education be individualized?
3. Will students be given more field experience before student teaching?
4. Can methods courses be taught in the schools in an expanded pre-service experience of perhaps a year or more?
5. Can on-campus and off-campus teacher education be integrated to bring theory and practice closer together?
6. Should the distinction between liberal and professional education be erased by integrating content and methodology?⁴
7. Will there be exemplary models of teaching within the college and university experience, and particularly within the professional sequence to change the image and role of the teacher? That truism "Teachers tend to teach as they were taught," comes into play in a most penetrating manner.⁵

In addition to these questions and many others concerning pre-service education, there is the matter of continued professional education.

Will the North Olmsted Centers become involved in in-service education?

If they do --

1. Will the universities be given a responsibility for on-site in-service training?
2. Can in-service programs be individualized?
3. Will these in-service programs be related solely to the development of corps of teacher supervisors for the pre-service program or will they relate to other areas of the schools programs as well?

⁴ Silberman, Charles E. Crisis in the Classroom, New York: Random House, 1970, p. 473.

⁵ Ramsey, Curtis Paul. "Elementary Teacher Preparation - Interface With Media," Audiovisual Instruction, April, 1971, p. 6.

Appendix A-10

4. Can a free or reduced tuition arrangement be set up for university sponsored in-service programs?

These and other questions need to be considered by university and public school educators dedicated to the development of Teacher Education Centers. There are those who believe that the maximum potential of this concept could mean the complete restructuring of teacher education from early undergraduate work through in-service and graduate levels.

There is no doubt that teacher education needs to change. For this change to be more than a superficial reorganization of courses and credit blocks, there must be communication and cooperation between the public schools and the colleges and universities. Teacher education centers are providing meaningful and ongoing communication and cooperation. The impetus for change is underway.

Appendix A-11

IV. Single Institution/Single School:

JOHN CARROLL UNIVERSITY-TAYLOR ROAD SCHOOL

TEACHER EDUCATION CENTER

The Taylor Center came into being at the request of the Director of Personnel of the Cleveland Heights-University Heights School system to the Department of Education at John Carroll University. As a result of this initial action, the chairman of the Department of Education began a series of planning meetings with the Assistant Principal at Taylor Road School to plan and implement the center. Materials provided by the Cleveland Commission on Higher Education Teacher Education Center Coordinating Committee such as The LeGrand paper¹ were used as resources. Field work students² were initially placed at Taylor Road School in the fall of 1971. In this way several constructs characteristic of teacher education centers could be tried out in a real setting. The next semester these field work students became the student teachers and new field work students were assigned. It was at this time that the staff of Taylor Road School began to express concerns and interest around meeting with the university staff to discuss these. As a result of expressed, realized needs, a committee of public school teachers, administrators and university staff was established which worked to set up objectives, structure and guidelines for the new center. It was their purpose to establish a school-college partnership which would focus on teacher preparation at the pre-service and in-service levels.

The committee initiated a series of activities in order to meet the goals. For example:

1. Seminars with university personnel, student teachers, teachers and field work students are held. These focus on mutual planning concerns and also upon skills which meet training needs.
2. Teachers are involved in instruction of field work students through methods demonstration lessons and participation in methods courses. These are held at the center.
3. Meetings with teachers are held to continue planning for the developing center.
4. Evaluation conferences are held involving all of the center partners. These focus on student evaluation, as well as center evaluation.

¹ Raymond A. LeGrand, "The Satellite Teacher Education Center: A Conceptual Model," Cleveland: The Cleveland Commission on Higher Education, March, 1970.

² Field work refers to a pre-student teaching experience where students are assigned to a school one-half day per week for one semester prior to student teaching. They engage in a number of experiences applying theoretical ideas to the school setting.

Appendix A-12

5. Representation on the Greater Cleveland Teacher Education Centers Coordinating Committee helps the center to utilize the resources of this group.
6. Material to be used in the center is mutually developed and agreed upon by the center partners.

As a result of these experiences teachers and student teachers began to see that they played an equal and important decision-making role in the center operation. This was demonstrated very vividly when the John Carroll University Education Department decided to change their elementary education program. They initiated the professional semester as a result of suggestions made by the Taylor Road School Center Committee.

The John Carroll University-Taylor Road School Center continues to grow and expand its focus. It is fast becoming one of the many resources available in the greater Cleveland area through the Teacher Education Centers Coordinating Committee for it provides one model of effective school, university cooperation.

Appendix A-13

V. Single Institution/Single Department

Padua Franciscan High School English Center (Cleveland State University)

English student teachers are clustered in the English Department of Padua Franciscan High School. The coordinator of the center is the Department Chairman who receives additional compensation for carrying responsibilities which include those previously assigned to a university supervisor. He places the student teachers and supervises them.

The Departmental program for students (and student teachers) is highly innovative. Traditional desks (both teachers' and students') have been replaced by a variety of less standardized furniture and equipment. The program of instruction includes core courses and performance electives with a wide range of individual choices possible. Both high school student assistants and (college) student teachers are integral members of the instructional staff. Student teachers receive a wide range of subject and instructional experiences.

Appendix B

GREATER CLEVELAND TEACHER EDUCATION CENTERS COORDINATING COMMITTEE (TECCC)

OPERATIONAL GUIDELINES 1972-73

DEFINITIONS:

A teacher education center is defined as a teacher training and professional development program operated under the shared auspices of one or more colleges/universities and one or more schools/school districts. Such a center may offer one or more levels of pre-service and in-service professional experiences.

A center team is defined as the set of persons--school personnel, college/university personnel and students--who are operationally involved in the activities of the center engaged in planning, implementing, and/or evaluating the center program of teacher training and professional development.

OVERALL OBJECTIVE: The Committee shall further the ends of improved pre-service and in-service teacher education in participating teacher education centers in Greater Cleveland through cooperation and sharing of resources.

MEMBERSHIP: The voting membership shall consist of one representative and an alternate from each cooperating teacher education center team. Ex-officio members shall include a representative from the Ohio State Department of Education, the Cuyahoga County Superintendents' Association, the Northeastern Ohio Teachers Association, the Cleveland Teachers Union and the Cleveland Commission on Higher Education. Associate (non-voting) members shall include such additional persons from area colleges, universities and school districts who wish to participate actively in fostering the objectives of the committee. (Full- or part-time center team coordinators usually--but not necessarily--serve as the team representatives to the TECCC. Alternates can be any person--school or college/university based--on the center team.)

PURPOSES: In matters affecting participating centers jointly the committee will be the policy council. Specifically, it will:

1. Recommend policy relating to the general cooperative activities in Greater Cleveland which support and extend the center concept.
2. Recommend procedures for resolving or avoiding conflicts in the assignment of student teachers to teacher education centers.
3. Identify problems and possible solutions regarding the preprofessional experiences of students from the cooperating institutions.
4. Serve as the coordinating body for the development and implementation of evaluation strategies to provide a feedback system among the groups and organizations involved for assessing progress and products within the centers.

Appendix B-2

- 2 -

5. Serve as a clearing house for research and experimentation as applied to the center concept.
6. Recommend guidelines for the seminar experiences available to the centers and set up procedures for the pooling of resources for special needs.
7. Recommend policy relating to the requirements needed in the student teacher experience.
8. Report annually to the cooperating institutions on programs, problems, promises, funding, etc.
9. Develop proposals for funding as needed.
10. Coordinate and facilitate public relations on the center concept.
11. Serve as a communication agency with outside groups.

ORGANIZATION: The members of the Teacher Education Centers Coordinating Committee shall annually elect a chairman, vice-chairman, and three members-at-large to form its executive committee. The Executive Secretary shall act as secretary to both the Teacher Education Centers Coordinating Committee and its executive committee.

EXECUTIVE SECRETARY: During the year (1972-73) the SITE Project Director of the Cleveland Commission on Higher Education will act as a part-time Executive Secretary and executive officer for the Committee.

CLEVELAND COMMISSION ON HIGHER EDUCATION

Cleveland, Ohio 44114

August, 1972

This paper describes the Teacher Education Center Workshop Kit developed by Creative Learning Systems, Inc. for the Cleveland Commission on Higher Education. The Workshop Kit grew out of needs of those working with teacher education centers in the Greater Cleveland area. The Workshop Kit has been designed with considerable flexibility so that teacher educators in school districts, and in institutions of higher education across the country might be able to use the Workshop Kit in improving their teacher education programs.

The Workshop Kit is based on the assumption that there is no one "right" model for a teacher education center. Hence the Kit can be used to enhance and support whatever model the user wishes.

For those who are not familiar with the concept of a Teacher Education Center, the following chart may help to distinguish the center approach from the conventional approach to the field preparation of teachers.

| <u>Activity</u> | <u>Conventional Approach</u> | <u>Center Approach</u> |
|---------------------------------|--|---|
| Assignment of Student Teachers | Scattered in many schools. | Clustered in buildings, chosen for particular experiences. |
| Supervision of Student Teachers | Individual student teachers supervised daily by master teacher, infrequently by college faculty member. Minimal communication between college and school supervisors. No coordination of in-school activities. | Directly, by master teacher. Indirectly, by college supervisor, through teacher. Frequently in-school program has part-time or full-time coordinator. |

| <u>Activity</u> | <u>Conventional Approach</u> | <u>Center Approach</u> |
|--|---|--|
| College Supervisor's Activity | "Circuit-rider" - visiting students in many locations. | Concentrated at center, available to student teachers and to all school personnel as an added resource. |
| Preparation of Master Teacher for Supervisory Role | Varies - usually minimal. | Workshops and other efforts to incorporate master teacher into teacher training team. |
| Seminar on Teaching | On campus, frequently not related to student teaching experience. | Usually at center, tied to experience in teaching. |
| Effect on School Environment | No direct effort to help with school program. | A direct effort made to improve the learning environment within the school. |
| Variety of Student Teaching | Usually one classroom with one master teacher. Little opportunity to visit other classes. | Often contact with two or more classes and teaching styles; sometimes assignments are to a teaching team or to a whole department. |
| Decision-Making | College dominated and imposed. | School-college partnership. |

Within these common characteristics of centers, there is room for a great deal of variety in the specific design and operation of centers. The Workshop Kit is designed to facilitate the development of centers which meet the unique needs of the schools and colleges involved.

Goals of the Workshop Kit

1. Content: To impart knowledge about what teacher education centers are and how they operate.

2. Process: To overcome communication barriers common to groups.
3. Planning: To lead toward the development of specific plans for starting centers or modifying those already in existence.

Depending upon time constraints and the desires of the user, components of the Workshop Kit can be modified to focus on any one of the above goals.

Overview of the Workshop Kit

The Kit supplies materials supportive of a workshop of from one to three days duration. The workshop is intended to stimulate personnel from public and private schools, and from institutions of higher education, to work together on planning a common teacher education center venture appropriate to a particular locale.

The materials supplied in the Kit encourage participant interactions. Several simulation games, described below, not only convey information about teacher education center alternatives but also allow participants to refine their group decision-making skills. By alternating activities in simulated and 'real-world' contexts, the workshop can move participants from excitement about the potential of the teacher education center concept into the preliminary phases of action planning for the local situation.

Contents of the Workshop Kit

COORDINATOR'S GUIDE:

An important feature of the Workshop script is the provision for a pre-workshop analysis of the local situation. By working through the *Pre-Workshop Analysis Pak*, the prospective Workshop Coordinator can determine the extent of his/her awareness of the factors to be considered

in planning and conducting a workshop.

Other major divisions of the *COORDINATOR'S GUIDE* are:

- (a) *Preliminary Decisions*: Worksheets dealing with preliminary decisions about Workshop purposes, intended participation, and logistical provisions.
- (b) *Program Components*: An overview of alternative program components and suggestions for use of the Kit materials.
- (c) *Workshop Arrangements*: Sample Workshop agendas; guidance in clarifying and communicating intentions; and a logistics checklist.
- (d) *Evaluation & Reporting*: Suggestions of ways of monitoring Workshop progress and of making follow-up evaluations; a sample Feedback Request Form keyed into the packaged program components.
- (e) *Resources*: An annotated bibliography on the teacher education center movement and a listing of significant literature on teacher pre- and in-service education published by the Association of Teacher Educators and the American Association of Colleges for Teacher Education; two papers elucidating the teacher education center concept; and a copy of the AACTE booklet *In West Virginia, It Is Working.*

SLIDE-TAPE PRESENTATION:

A typical Workshop would begin with the showing of an audio tape/slide presentation *TEACHER EDUCATION CENTERS: A BRIDGE TO EDUCATIONAL EXCELLENCE*, supplied with the Kit.

"T.E.C. AUCTION":

In a simulated auction setting, players "bid" competitively in attempts to "purchase" various resources and materials appropriate to teacher education center programs. The auction informs participants of some of the possible ways to provide pre-service and in-service training in Teacher Education Centers; offers them an opportunity to gain insights into their own educational philosophies; and gives the Workshop leader data on preference trends within the playing groups.

The packages of materials for the "T.E.C. AUCTION" simulation contain procedural instructions, sets of auction catalogues and bidders' paddles, and a Debriefing Guide. "T.E.C. AUCTION" can be an entertaining and informative warm-up activity for T.E.C. Workshop participants.

"CENTERING":

In this simulation a committee engages in a decision-making task related to the development of a hypothetical new teacher education center. Participants assume roles that highlight the effects of vested interests and typical group-member behaviors on task accomplishment. The simulation components, which are packaged in a compact vinyl portfolio, include an audio-cassette with recorded instructions for the simulation coordinator and for the participants, player role cards, and a debriefing guide. This simulation can be played in conjunction with "FEEDBACK" *Intervention A* (described below) to train observers in group-process monitoring techniques.

"PRO's & CON's":

This simulation is designed to give participants opportunities to practice a 'Devil's Advocate' deliberation style that can counteract uniformity of thinking and intensify the depth and thoroughness of reflection on major issues. Group discussion around operational issues of teacher education centers is structured in a way that "legitimizes" the open discussion of the pros and cons of controversial issues such as:

Should school teachers in Centers have a say in how cooperating universities train prospective teachers?

Should cooperating teachers be released from some of their regular assignments to give them time to engage in Center activities?

Should university personnel assigned to Centers have a role in developing curriculum for youngsters in the cooperating schools?

Each package of "PRO's & CON's" includes written instructions for the leader, a pad of sheets on which trends in group opinions and discussion highlights may be recorded, and "Players Packets" consisting of sets of palm-size, ring-bound cards which use a color code to cue the rotation of the "pro", "con" and "neutral" positions on each issue that is debated.

The simulation "PRO's & CON's" is designed to move the participants from discussion of issues provided in the simulation to identification and discussion of "real world" local issues.

Issue Analysis WORKSHEETS:

The "PRO's & CON's" simulation may be followed by small group discussion of issues of actual concern to the Workshop participants. A packet of Task Force WORKSHEETS is supplied as an aid to structuring such discussion. The WORKSHEETS can be used to identify significant

issues, specify the positions that can be taken and list the pros and cons of taking particular stances on the issues. A summary report based on data from the *WORKSHEETS* can serve as the input into a comprehensive plan for improving existing centers or starting new ones.

"FEEDBACK" CARDS:

The *"FEEDBACK" Card Deck* supplied with the Workshop Kit consists of a set of cards whose faces graphically depict several group-discussion behaviors. The cards can be used in a variety of ways, two of which are described here as *"FEEDBACK Intervention A"* and *"FEEDBACK Intervention B."*

FEEDBACK INTERVENTION A (Process Monitoring)

A group-process observer withdraws from group interaction and uses the *FEEDBACK Cards* to categorize group-member statements. Periodically, he/she interrupts the group's discussion to "feed back" what has been observed, by laying out before the group the cards that were sorted out, by commenting on the interaction patterns that emerge, and by engaging the group in a brief analysis of the implications of the *FEEDBACK* display.

This type of intervention can introduce participants to the role of disinterested observer and demonstrate the utility of having one group member play such a role during a team's deliberations.

FEEDBACK Intervention B (Sharing Leadership Functions)

The *FEEDBACK Card* categories used in this intervention represent the kinds of moves commonly made by group leaders: CLARIFYING, EXPEDITING, SUMMARIZING, SUPPORTING, GATEKEEPING, HARMONIZING, EVALUATING, and CONSENSUS TESTING. Before a group

begins work on a task, three cards from the above-listed categories are dealt, face down, to each group member. During the course of the group's discussion, each participant is to attempt to "play" all of the cards in his "hand" by making well-timed remarks that fall into each of the categories symbolized by the cards he/she holds. This intervention offers opportunities for group members to practice engaging in leader-like behaviors that may not ordinarily be part of their repertoires. In addition, it can help wean a group away from excessive dependance on a titular leader to make things "move" during a meeting.

"PRIORITY PLANNER":

The *PRIORITY PLANNER* is an aid to gaining group consensus on priority rankings. The *PRIORITY PLANNER* technique is applicable to a wide range of situations calling for the ranking of alternatives in an order from most to least importance. Among the kinds of listings to which it might be applied by a Workshop discussion group are lists of things to be done, items to be purchased, role positions to be filled, criteria to be used in judging something, issues to be discussed, and data to be gathered. Commonly, when groups attempt to rank in priority order a long list of items, there is fairly ready agreement on which items are of highest and which are of lowest priority. However, difficulties in deliberation usually are related to the middle-range selections. The *PRIORITY PLANNER* helps with the sorting of the middle-range items.

Conclusion

The T.E.C. Workshop Kit has been field-tested in the Cleveland area with promising results. Plans are currently being drawn up for disseminating information about the Kit to educators who are involved in teacher education center development.

Inquiries about the T.E.C. Workshop Kit should be addressed to:

RE: Announcement of Training Opportunity under the SITE Project
for key college and school staff members; Request for
nominations.

Background

M
E
M
O
R
A
N
D
U
M
We have just completed an intensive study of the training needs which must be met to guarantee the ultimate success of school system-college and university partnerships such as the emerging teacher education centers. From this study we have determined that the most feasible strategy possible with the resources of the SITE Project would be to train a small core of skilled local helper-consultant/trainers who in turn could provide assistance to the various school-college planning groups and other critical cooperative educational planning activities.

Objective

The major objective of this activity is the development of a small core of persons, through training, who could serve as effective resource people--consultants, trainers, helpers--to meet a wide variety of individualized needs.

Trainers

We have negotiated the assistance of McBer and Co. of Cambridge, Mass. to provide an intensive trainer-training program whose details are given in the attached announcement. McBer and Co., a division of Sterling Institute, has had wide and varied experience in the initiation and management of individual, organizational and community change. Their emphasis is on training persons to solve problems and improve personal and group performance.

Trainer-candidates

The most critical aspect of this endeavor will be the selection and commitment of the persons to be trained as trainers. Each potential candidate should meet the following criteria:

1. Does he/she have the time necessary to be utilized in training/consulting?
2. Does he/she want to assume the role of a trainer/consultant?
3. Will the potential client system accept him/her as a trainer/consultant?

There will be a screening process used which will entail nominees responding to certain instruments designed to help determine their commitment and potential skills as trainers/consultants. Interviews with each nominee will be held to help confirm the degree to which the three criteria above are met.

The Training

The training consists of three training seminars each of four days duration spaced over approximately six weeks. Because of the highly individualized nature of the training and our budgetary limitations only 10 trainer candidates can be accommodated.

The training costs are to be borne by the SITE Project grant. A registration fee of \$15.00 per person per four-day seminar will cover incidentals and luncheons. (We estimate that equivalent training including all three seminars if offered on a public basis would require a tuition fee of approximately \$1000 per participant.)

The ten trainer-candidates will participate in an initial four-day experimental seminar entitled, "Managing the Motivation of Yourself and Others." This seminar is tentatively planned for Friday, Saturday, Sunday and Monday, December 1-4, 1972. All 10 of these initial candidates should plan to continue the training two weeks later in a second four-day seminar (tentatively scheduled for December 15-18.) It is expected that from 5-10 persons will complete the training in a third four-day seminar tentatively scheduled on January 12-15, 1973. (All trainer candidates, however, should plan initially to be available for all three training seminars. The nature of the training demands uninterrupted involvement throughout each four-day session.)

Persons undergoing the training in seminars II and III will be expected to become engaged in their own helper-consultant-trainer interventions with an outside group. Thus, a rapid pay-off with succeeding group planning processes throughout Greater Cleveland is envisioned provided we find the appropriate committed individuals for training and they are "made available" to the educational community.

Additional Participants in Seminar I

Seminar I (tentatively scheduled for December 1-4) is being planned to accommodate an additional 15 participants besides the 10 trainer candidates. College and school officials who can benefit by gaining an understanding of the nature of the training are being invited to participate. This group of persons would not continue with the subsequent intensive training in seminars II and III. They would, however, consider as part of Seminar I, how they can facilitate and support the work of the trainers after they complete their training.

Request for Nominations

Please send me names of potential candidates as soon as possible. We will handle the followup contacts with candidates. Please encourage any persons you think might be interested, qualified, and available to call Ed Fox directly for further information (241-7583).

MANAGING THE MOTIVATION OF YOURSELF AND OTHERS

A TRAINER-TRAINING OPPORTUNITY

Sponsored by the
CLEVELAND COMMISSION ON HIGHER EDUCATION SITE PROJECT
(Supported by a grant from the Martha Holden Jennings Foundation)

OBJECTIVE

To develop up to ten individuals, through training, who can and will serve as effective resource persons--consultants, trainers, helpers--to meet a wide variety of individualized needs in planning and development of cooperative educational activities.

TRAINING PROGRAM

Three intensive seminars of four-days duration each (tentatively scheduled for December 1-4, December 15-18, and January 12-15) comprise the total training program for ten trainer candidates.

Seminar I.

The first four-day demonstration seminar is open to an additional 15 school and college officials. Its purposes include the following:

1. To understand motivation as it affects the amount that a student and/or teacher learns; and as it affects their own effectiveness as professionals.
2. To isolate those individual factors which inhibit learning in those they are attempting to help and in themselves, e.g., lack of achievement motivation, the belief that an individual can't change;
3. To identify how their own and others various levels of motivation can be changed and/or met;
4. To gain an understanding of the process of setting measurable, time-phased goals to develop individual achievement and professional effectiveness; and
5. To expose the trainer candidates to an intensive experiential program which would use many of the theoretical concepts which he/she would be required to learn.
6. To expose the other school and college officials to an intensive experiential program which would demonstrate many of the theoretical concepts underlying the training/consulting interventions.
7. To test the commitment of the trainer candidates to continue training and to set tentative goals for trainer/consultant interventions.
8. To set goals and strategies for school and college officials to act as facilitating supporters of the trainers.

Seminar II.

In the second four-day seminar 10 trainer-candidates will continue their more intensive training. In this seminar the potential trainers would deal with the development of the following skills:

1. Needs assessment and how to conduct a needs assessment meeting.
2. Understanding the needs of self and others (motivational and how people learn) and an understanding of how those needs can be met.
3. Preparing realistic action plans to meet diagnosed needs.
4. Designing and conducting interventions to carry out action plans.

Finally, the trainer candidates would develop and test action plans to conduct an initial training intervention (of one-half day or less duration) with a selected outside group (students, faculty, civic or religious group, teacher education center team, or other group).

Seminar III.

In the third four-day seminar the trainer candidates who have completed the previous two seminars and the resulting assignments will evaluate their progress in the initial outside training interventions, reevaluate and replan their goals and gain commitments from the overall group to plan to help each other on an ongoing basis. Each trainee will complete the program with a well-developed plan of action for utilizing his/her skills as a helper-consultant/trainer.

COST OF TRAINING

Training costs will be borne by the SITE Project grant from the Martha Holden Jennings Foundation. A registration fee of \$15.00 per participant per seminar payable to the Cleveland Commission on Higher Education must be paid prior to each seminar at the time registrations are confirmed. This fee covers incidentals and luncheons.

APPLICATIONS

Applications (or nominations) should be made directly to Dr. Edward J. Fox, SITE Project Director, Cleveland Commission on Higher Education, 1367 E. 6th St., Cleveland, Ohio 44114 (Phone: 241-7583) in the form of a letter or phone message. Additional information and procedures will be indicated on a personal basis.

The Training Task Force of the Greater Cleveland Teacher Education Centers Coordinating Committee has secured the services of Mrs. Fran Joseph. Mrs. Joseph will be contacting you in the very near future to solicit your views on teacher education center staff training needs. We are hopeful that you will find it possible to cooperate with her request for information. The Training Task Force expects to publish a report in the next six weeks or so which would do the following things:

1. Identify existing and past center staff training programs.
2. Identify persons who are available and have expertise related to center staff training.
3. Describe the status of center staff training programs in teacher education centers.
4. Identify the most critical immediate staff training needs in the teacher education centers.*

Should any questions arise concerning this request for data please do not hesitate to contact me directly (241-7583). Thank you for your cooperation.

*The Task Force plans to arrange for some immediate training interventions to help meet the most critical needs identified, hopefully by January.

SITE Project Expands on STIP Activities

SITE -- a *Project for Stimulating Innovative Teacher Education* -- extends activities begun in the *Greater Cleveland Student Teaching Improvement Project*. STIP -- a federally-funded three-year project -- was completed in October, 1970. SITE, including the IN-SITE Newsletter, is funded by a grant from the Martha Holden Jennings Foundation.

SITE emphasizes innovative approaches to three objectives: (1) expansion of communications between school and college personnel, (2) provision for upgrading within the teaching profession, and (3) encouragement of experimental programs in teacher preparation. A steering committee provides policy guidance and long-range planning for activities and outgrowths of SITE. (See below). SITE sponsors workshops and conferences on various critical areas in teacher education. An October invitational conference initiated this series. (See p. 2). A March 26th conference is planned on the preparation of Humanities teachers. Initial arrangements have been made for a late Spring conference on Science Education.

SITE Project Steering Committee Explores New Directions

The SITE Project Steering Committee, established jointly by the Cleveland Commission and the Cuyahoga County School Superintendents' Association, broadly represents area institutions and groups concerned with the preparation of teachers. It serves as a test model for the development of more viable communications channels among the professional educators in Greater Cleveland. Representatives on the committee are: Sister Alice Clare, Chairman, Department of Education, Ursuline College; Dr. Edward J. Fox, Associate Director, Cleveland Commission on Higher Education; Miss Cathy Henry, Senior Education Major, Cleveland State University; Sister Mary Leopold, Principal, St. Albert-the-Great School; Mr. Ray Leopold, President, Northeast Ohio Teachers Association; Dr. Marvin Maire, Superintendent, South Euclid-Lyndhurst City Schools; Sister Michaelene Meyers, Graduate Student, St. John College; Dr. John Morford, Director of Teacher Education, John Carroll University; Mr. James E. O'Meara, President, Cleveland Teachers Union; Mr. Alan Shankland, Executive Secretary, Cuyahoga County School Superintendents' Association; Dr. Robert Van Auken, Superintendent, North Olmsted City Schools; and Sister Mary Winfred, Teacher Education Faculty, Notre Dame College. (Cont'd. pg. 2)

PLEASE PASS THIS FIRST ISSUE OF IN-SITE ALONG TO A COLLEAGUE CONCERNED ABOUT TEACHER EDUCATION. WRITE TO THE EDITOR TO CONFIRM YOUR CORRECT NAME AND ADDRESS ON THE SUBSEQUENT MAILING LIST.

The steering committee is expected to evolve, from an initial advisory panel for the SITE Project, to a policy body directed toward the expansion of cooperative activities between schools and colleges in any aspect of teacher education. Currently it is exploring a proposal to develop a teacher education resource center (TERC). The instructional materials situation has moved rapidly from almost nothing of real value available to the current plight where most colleges are not able to afford what is available. College personnel are hard pressed to determine which materials on the market are effective and appropriate to their instructional objectives and strategies.

Dr. John Morford, former teacher education consultant to the Cleveland Commission and Director of STIP, has accepted the Committee's invitation to head the development of the TERC proposal.

Teacher Education Centers Multiply Rapidly

A major outcome of STIP was intensive planning for development of teacher education centers. Planning grants were committed from STIP funds to develop five of these centers.

Since September, 1970, eighteen centers have advanced to operational stages and at least four other centers are being planned. The next issue of IN-SITE will summarize these developments and include descriptive material illustrating the wide variety of patterns emerging. This rapid development is being aided and studied by the Teacher Education Centers Coordinating Committee which is made up of representatives from all the involved or interested schools and colleges. TECCC meets to exchange ideas and to cooperate in the development of recommended goals, procedures and criteria for evaluating the success of these new ventures.

Already some dramatic breakthroughs are in evidence as a genuine partnership between colleges and schools emerges. In-service programs are being related to (and grow out of) cooperation in pre-service preparation of teachers. School personnel are beginning to assume the role of teachers of teachers at the action level while college personnel are becoming involved in the classroom level demonstration of theory in action. Personalization of instruction is rapidly becoming a reality for the teachers in these new centers.

Kineposium at Fall Conference Stimulated Enthusiastic Interaction Among Educators

Over 100 persons engaged in an extended two-day dialogue on Teacher Education in Greater Cleveland: Who, Where, What and When held last October 15-16 at Mt. Augustine Retreat Center in West Richfield, Ohio. Dr. Robert F. Peck, Co-Director, Research and Development Center for Teacher Education, University of Texas in Austin, brought the opening message, "New Frontiers in Teacher Education." He stressed the need for personalizing education and the development of instructional modules designed to promote specific teacher behaviors.

The key feature of the Conference was the kineposium where each conference participant engaged in eight different groups. Eight topics were each discussed eight times while participants were shuffled at each change. Thus, each participant had at least one opportunity to interact with every other participant. (Cont'd. pg. 5)

This intimate interchange involved one State Department of Education official, 13 school administrators, 12 school teachers, 13 college students, 61 college faculty and administrators (from 21 institutions), and 8 observers. A college dean commented, "I enjoyed the small seminars. When I first saw that they were cut out for only twenty-five minutes each, I had serious doubts as to any achievement which might occur in that small length of time. However, you have made a believer of me. It is possible to swing around that often and to get something out of each session." A university faculty member added, "I've been converted! I used to believe in 'doing my own thing,' but now I see the potentially great rewards in cooperative activity."

*Reorganized Education Committee
Grapples with Expanded Agenda*

Known previously as the Teacher Education Committee, the Committee of department chairmen and deans was reorganized in November, 1970, to serve as the top level policy and program guidance group for Commission activities in the total area of undergraduate and graduate professional education. Dr. Bertram Masia, Education Department Chairman at Case Western Reserve University, served as chairman of the Committee for the first quarter (December-February). The chairmanship will rotate among the eight members including: Sister Alice Clare, O.S.U., Chairman, Department of Education, Ursuline College; Sister Mary Josetta, C.S.J., Dean of Education, Saint John College; Dr. Ray LeGrand, Chairman, Education Department, John Carroll University; Dr. Fay-Tyler Norton, Head, Social Science Department, Cuyahoga Community College; Dr. Paul Smith, Associate Dean of Education, Cleveland State University; Dr. Robert Trautmann, Chairman of Education Division, Baldwin-Wallace College; and Sister Mary Verone, S.N.D., Chairman, Department of Education, Notre Dame College. Dr. Edward Fox, Associate Director of the Commission acts as Executive Secretary.

The Education Committee meets monthly to review the education activities associated with the Commission. Long-range planning has been identified as a key responsibility by this group. At a special meeting on January 27th the Committee reviewed the programs at the four institutions offering graduate work in Education. Opportunity was given for these institutions to share their immediate and long-range goals for graduate studies in an effort to avoid undesirable duplication of effort. A real sense of cooperative concern for the total professional education movement in Greater Cleveland is evident in the committee's enthusiasm and candor.

*TECCC Conference/Workshop
Slated for February 12th*

An all-day (9:30-3:30) Conference/Workshop is being sponsored by the Teacher Education Centers Coordinating Committee on February 12, 1971, at the Gwinn Estate, 12407 Lakeshore Blvd., Bratenahl. The program includes planning sessions to modify the structure and representation of the TECCC. One proposal before the Committee calls for each Teacher Education Center to elect a representative and an alternate. This would alter the present independent representation from colleges and schools.

Other workshop sessions will bring together representatives of the operating centers to share their experiences and to collectively identify common needs which might be met by cooperative action. Additional action is expected in defining criteria which may be useful in subsequent evaluations of progress in and the effectiveness of the Teacher Education Centers.

*CUTE Examines Uniqueness
of Urban Teaching*

A Council On Urban Teacher Education (CUTE) has been meeting to explore particular aspects of the inner-urban schools which have special ramifications for teacher education programs. Support for this Council was made available to the Commission through a grant from the Martha Holden Jennings Foundation.

While most of the current funding is directed toward the support of a special Ohio University-Cleveland City School District exchange program, the Council was created to oversee this activity and to develop, as appropriate and feasible, effective interrelationships between Cleveland area colleges and the selected school systems (including at this point Cleveland, East Cleveland, Shaker Heights, Cleveland Heights, and Warrensville Heights).

Representatives from area colleges and the inner-urban school systems who are particularly related to the urban teaching problems have been surveyed to identify problems of potential cooperative interest. A high priority is attached to the development of an effective mechanism for stimulating real progress in meeting the critical needs of the inner-city schools. Dr. Donald Swegan, Executive Director of the Commission, acts as Executive Secretary to this Council.

*Future Features for
IN-SITE*

In the coming issues of IN-SITE articles will report (1) Descriptions of Teacher Education Centers, (2) Selected developments in teacher education at member and cooperating institutions, (3) Provocative challenges to stimulate innovation and experimentation in teacher education (Letters to the Editor welcomed), and (4, Reports on activities of several active committees. Your reactions and suggestions are cordially invited.

ALERT

NEW
TECCC
ALERT

This Teacher Education Centers ALERT is addressed to all persons in Greater Cleveland who wish to relate to the development of Teacher Education Centers. This new series of bulletins is being published by the Greater Cleveland Teacher Education Centers Coordinating Committee (known

TECCC
OBJECTIVES

as TECCC for short). TECCC, in its third year of activity, exists to support the development of a network of teacher education centers in Greater Cleveland through cooperation and sharing of resources. Each cooperating center team (made up of school and college personnel) has one representative and an alternate on the Committee. Associate members include any other persons from area colleges, universities, and schools who wish to actively foster the development of teacher education centers.

TECCC
MEMBERS

TECCC
SUPPORT
ACTIVITIES

The TECCC has adopted five major program goals for 1972-73 (confirmed at its meeting at St. John College on Saturday, September 30, 1972):

FLASH

TECCC Meeting
December 11th
6:30 p.m.
John Carroll
University

1. To establish specific organizational mechanisms to ensure that the development of teacher education centers continues as a viable movement after June 1973. (The SITE Project of the CCOHE, which provides staff and other resource support to TECCC terminates in June 1973).
2. To establish a training system to meet teacher education center teams' needs and to meet specific center personnel needs.
3. To implement an information system to support teacher education center teams.
4. To conduct evaluation activities which will assist the TECCC and teacher education center teams improve the center programs.
5. To stimulate new school-college partnerships through the establishment of additional teacher education centers in Greater Cleveland.

TECCC
TASK
FORCES

Task Forces to work specifically on activities to achieve the above goals were established on September 30th. If you wish to assist in these efforts please let Ed Fox know (call 241-7583).

TECCC
ALERT
BULLETINS

The TECCC ALERT will appear as a series of four different bulletins. Each issue will normally deal only with one or two brief items. If kept on file, they should comprise a compendium of what overall efforts are being made to cooperatively foster center development. The four bulletins are:

1. ORGANIZATIONAL BULLETIN - - announcements pertaining to the GCTECCC, its meetings, and Program Goal No. 1 above.
2. TRAINING BULLETIN - - announcements of training opportunities for center personnel, information on training resources, reports of training needs, training results, and other items pertaining to Program Goal No. 2 above.
3. INFORMATION BULLETIN - - information about centers, directories of personnel and other resources, items designed to promote inter-institutional and inter-center sharing, and other matters related to Program Goal No. 3 above.
4. EVALUATION BULLETIN - - announcements of evaluation activities, reports on the systematic feedback of data from center participants to planners, and other items pertaining to Program Goal No. 4 above.

ROSTER OF TECCC MEMBERS

An updated roster of TECCC members is included with this issue of ALERT. Representatives and alternates from 27 centers in Greater Cleveland are listed. Several centers are still in the process of designating their representatives.* These names will be reported in subsequent issues of ALERT: Organization Bulletin. Please call ED FOX, (241-7583) if you spot any errors.

*The following 5 centers cooperating with Kent State University will shortly be designating their representatives: Mentor Center, Grant Elementary (Lakewood), Walton Elementary School (Cleveland), Parma Secondary Center, Solon-Orange Center.

Nominations Solicited

Monday, December 11, 1972; 6:30 p.m.
Alumni Lounge-Student Activities Center
John Carroll University

INVITEES:- All TECCC Representatives and
Alternates
- All Associate Members
- Any other interested persons

PROGRAM: Dinner - \$2.25 per person

- "An Urban View of Emerging
Strategies in Teacher Education"
Dr. James Tanner, Assistant
Superintendent, Cleveland Public
Schools.
- Action Status of the TECCC Task
Forces
- A brief look at new activities
in the centers
- Election of Executive Committee-
Elect

Reservations Please: Return the reservation form below with your check for \$2.25 made out to the Cleveland Commission on Higher Education or call Ed Fox, (241-7583) before December 7th.

Make your reservation now!

The present TECCC Executive Committee was elected in May 1971. Members are Dr. Sally Wertheim, Chairman (John Carroll University); Dr. Patrick Cosiano, Vice-Chairman (Ohio University); Miss Edna Stinson (Cleveland Public Schools); Mr. Jerry Graham (Shaker Heights Public Schools); and Mr. Larry Mervine (East Cleveland Public Schools). They were instructed at the Sept. 30th TECCC meeting to arrange for the selection of an Executive Committee-Elect to serve with the present Executive Committee for the balance of this school year or until any new organizational structure has been adopted for TECCC.

Nominees must be members of the TECCC (see Roster attached). Your nomination of a person (self-nomination encouraged) on the ballot/reservation form below will help provide a slate from which 5 persons will be elected at the next TECCC meeting on December 11th (see announcement to the left). All nominees will be personally contacted before balloting to ascertain their interest and willingness to serve. Please accept this as a real opportunity to become involved or to encourage another to become involved in an exciting metropolitan-wide developmental effort.

TECCC Nomination & Reservation Form

1. I nominate _____ to serve on the TECCC Executive Committee-Elect.
2. Please reserve _____ dinner tickets for the Dec. 11th TECCC meeting at John Carroll University. (My check for \$ _____ is enclosed--made out to Cleveland Commission on Higher Education).

FOREWORD

For many years teacher educators decried the lack of adequate materials and resources developed specifically for use in training teachers. As a result, in the past 10 years an ever increasing volume of films, tapes, video-tapes, mini-courses, training modules, simulation exercises, etc., have been developed and made available both within the profession and commercially.

National and local trends in teacher education, e.g., Teacher Education Centers, emphasis on performance criteria, program individualization, new NCATE standards, etc., all serve to increase the need for the use of such resources in Cleveland area schools and colleges in both pre-service and in-service teacher education programs.

Several factors, however, seem to be preventing these new resources from full use:

- 1) Many are too expensive for a single institution to purchase, often several thousand dollars even for film sets or mini courses. Certainly, in toto, cost is prohibitive for any one college or school.
- 2) For items available for rental, (and many are not) long waiting periods are common.
- 3) Merely keeping track of what is available or being developed has become difficult for hard-pressed school administrators and college faculties.
- 4) More importantly, evaluating and testing the quality and usability of available resources is often impossible; therefore, since costs are too high for random purchase, most institutions simply do without.
- 5) Where such resources are even now available locally, this fact is often unknown to other colleges and schools who might share them to everyone's gain.
- 6) Unless a desirable resource is to be used frequently, purchase often can't be justified by any one institution, especially as regards some of the more sophisticated items.

As a first step toward resolving the above problems, this Catalogue is being compiled to facilitate the sharing of such teacher education resources. This is the first edition of this catalogue. Hopefully it will evolve into something broader in scope and more useful to trainers of teachers whether they be located in colleges or in school districts.

USER'S INSTRUCTIONS

1. Resources are grouped according to the categories indicated below. These categories are based on those used in Mediated Teacher Education Resources, published by the American Association of Colleges for Teacher Education.
 1. Audio Tapes
 2. Simulations and Games
 3. Motion Pictures
 4. Multi Media
 5. Slides and Filmstrips
 6. Videotapes
 7. Microfilm and Microfiche
2. As you find an item that you wish to borrow, contact the person indicated.
3. Send errors, additions, delineations, corrections and other suggestions to Assistant Director for Teacher Education, Cleveland Commission on Higher Education, 1367 East Sixth Street, Cleveland, Ohio 44114. (Area code 216 - 241-7583).
4. Blank forms for additions, deletions and other changes are provided in the back of this catalogue.

7. *Title:* FROM SOCIABLE SIX TO NOISY NINE
Producer: Crawley Films
Descriptor: Motion Pictures
Specific Material: 21 minutes, color, 16 mm sound film
Running Time: 21 minutes
Description: Studies the behavior patterns of children from six to nine years old. Discusses the meaning of various forms of conduct and describes ways in which parents may guide and govern their children through a challenging, often trying phase of development. Presents a family with three children to show how the parents cope with situations that often baffle adults concerned with child training. Suggests that parents accepts the six-to-nine year-olds as they are, as children with minds of their own, and as individuals in their own right; not as inferior adults.
Availability: Available when not in use

8. *Title:* LEARNING AND BEHAVIOR (THE TEACHING MACHINE)
Producer: Carousel Films
Descriptor: Motion Pictures
Specific Materials: sound, black and white, 16mm
Running Time: 29 minutes
Description: Describes how learning and conditioning can be measured and analyzed in the laboratory. Shows that all learning depends upon reward as a means of reinforcing a learned response, and that without this factor there is no learning. Discusses the relationship between work done by Drs. B.F. Skinner and R.J. Herrnstein and that of the Russian psychologist Dr. Pavlov.

Producer: Guidance Association
Descriptor: Multimedia
Specific Material: 2 records and filmstrips (audio tape too)
Running Time: 30 minutes each
Description: Describes new developments in schools. PR oriented.
Availability: Available when not in use
Special Comments:

Contact: Dr. John Morford
John Carroll University
491-4331
13. Title: TEACHING ENGLISH
Producer: Bailey Films
Descriptor: Multimedia
Specific Material: Record and filmstrip
Running Time: 20 minutes
Description: As title implies
Availability: Available when not in use
Special Comments:

Contact: Dr. John Morford
John Carroll University
491-4331

14. *Title:* GUIDANCE FOR ALL
Producer: Division of Guidance - State of Ohio
Descriptor: Multimedia
Specific Material: Record and filmstrip
Running Time: 20 minutes
Description: As title implies
Availability: Readily available for loan (2 sets)
Special Comments:

Contact: Dr. Lee Hoover
John Carroll University
491-4331

15. *Title:* STUDENT TEACHING AND TEACHER ORIENTATION
Producer: Bailey Films
Descriptor: Multimedia
Specific Material: 3 records and filmstrips
Running Time: See below
Description: 3 records and filmstrips:
1. The Student Teaching Experience
Part I - 10 1/2 minutes
 2. Part II - 8 1/2 minutes
 3. Beginning Teacher Orientation - 5 1/2 minutes
- Availability:* Available when not in use
Special Comments:

Contact: Dr. F. T. Huck
John Carroll University
491-4331

16. *Title:* AS THEY GROW: ELEMENTARY GUIDANCE
Producer: Guidance Association (For State Board - Ohio)
Descriptor: Multimedia
Specific Material: 2 filmstrips and 2 records
Running Time: 30 minutes
Description: Shows role of elementary counseling
Availability: Readily available for loan (we have 2 sets)
Special Comments:

Contact: Dr. Lee Hoover
John Carroll University
491-4331

17. *Title:* TESTING: ITS PLACE IN EDUCATION TODAY

Producer: Guidance Association

Descriptor: Multimedia

Specific Material: Filmstrip and record set (2 each)

Running Time: 30-40 minutes

Description: 2 records with filmstrips

Availability: Available when not in use

Special Comments:

Contact: Dr. John Morford

John Carroll University

491-4331

18. *Title:* THEY HAVE OVERCOME

Producer: Warren Schloat Product

Descriptor: Multimedia

Specific Material: 33 1/3 record and filmstrips (5)

Running Time: 30 minutes each

Description: Successful Negroes tell their own story on film and sound.
5 filmstrips and records.

Availability: Available when not in use

Special Comments:

Contact: Mr. Ronald Oleksiak

John Carroll University

491-4331

19. *Title:* MASTER TEACHER AT WORK

Producer: Cleveland Commission on Higher Education

Descriptor: Multimedia

Specific Material: 1 filmstrip - 2 audio tapes (on 1 reel)

Running Time: 18 minutes

Description: Designed to orient cooperating teachers and student teachers.
Use same filmstrip for both but relevant tape for audience.

Availability: Available when not in use

Special Comments:

Contact: Dr. F. T. Huck

John Carroll University

491-4331

20. *Title:* JANUS JR. HIGH SCHOOL PRINCIPALSHIP SIMULATION
Producer: University Council for Education Administration
Descriptor: Multimedia
Specific Material: Movies, tapes, filmstrips, in-box materials, etc.
Running Time: 25 hours total
Description: A comprehensive simulation packet on urban junior high administration.
Availability: Not at all available for loan*
 Available when not in use*
Special Comments: *Certain parts of the unit can be borrowed but expendables can not.

Contact: Dr. Alex Felduebel
 John Carroll University

23. **Title:** 14 FILMSTRIPS AND TAPES (SEE BELOW)
Producer: Vimcet Associates
Descriptor: Multimedia
Specific Material: Filmstrips and tapes
Running Time: 1/2 hour each
Description: EDUCATIONAL OBJECTIVES - Developing precisely stated instructional goals.
SYSTEMATIC INSTRUCTIONAL DECISION MAKING - An empirically based instructional model.
SELECTING APPROPRIATE EDUCATION OBJECTIVES - Modified versions of the Taxonomics of Educational Objectives.
ESTABLISHING PERFORMANCE STANDARDS - Determining levels of learner proficiency.
APPROPRIATE PRACTICE - Schemes for providing the learner with relevant practice.
PERCEIVED PURPOSE - Establishing an "instructional set" for learners.
EVALUATION - Judging the quality of instruction.
A CURRICULUM RATIONALE - An examination of Ralph Tyler's curriculum model.
DEFINING CONTENT FOR OBJECTIVES - Objectives which possess broad content generality rather than test item equivalence.
IDENTIFYING AFFECTIVE OBJECTIVES - Generating measurable instructional objectives in the affective domain.
ANALYZING LEARNING OUTCOMES - An introduction to task analysis procedures.
KNOWLEDGE OF RESULTS - Providing the learner with feedback regarding his instructional responses.
TEACHING UNITS AND LESSON PLANS - Recommended elements of the two most popular forms of instructional plans.
DISCIPLINE IN THE CLASSROOM - Applying operant methods to problems of classroom control.
24. **Title:** FAMILIES AT WORK BY L. SENESH
Producer: Science Research Associates
Descriptor: Multimedia
Specific Material: Set of reel to reel tapes (also 33 1/3 record), filmstrips, teacher's guide and pupil activity book.
Running Time: Lessons of 15 minutes each
Description: Developed at Purdue to give children in primary grades an introduction to the fundamental principles underlying the functioning of our social world.
Availability: Available when not in use
Special Comments:
- Contact:** Miss Sandy Dolechek
Department of Education
Baldwin-Wallace College
826-2166

25. *Title:* JUNIOR READING FOR UNDERSTANDING
Producer: Science Research Associates
Descriptor: Multimedia
Specific Material: Reading kit
Running Time:
Description:
Availability: Available when not in use
Special Comments:

33. *Title:* SPEECH TO PRINT PHONICS - A PHONICS FOUNDATION FOR READING
Producer: Harcourt, Brace and World - Written by Donald Durrell & Helen Murphy
Descriptor: Multimedia
Specific Material:
Running Time:
Description: Multi-media kit. A self contained package including teacher's manual, 233 applied phonics practice cards, 34 sets pupil response cards. The set is used to teach linguistic principles with techniques of high efficiency and learning to increase both quality and amount of learning in each class.
Availability: Available when not in use
Special Comments:
- Contact:* Instructional Media Library
Mather Hall - Case Western Reserve University
368-2229

34. Title: EDUCATIONAL OBJECTIVES
Producer: Vincet Associates
Descriptor: Multimedia
Specific Material: Audio tape/filmstrips
Running Time:
Description:

EDUCATIONAL OBJECTIVES. This program assists one in developing precisely stated instructional goals. At its conclusion viewers are able (1) to distinguish between behaviorally and non-behaviorally stated instructional objectives and (2) convert non-behavioral objectives to a form specifying student post-instruction objectives.

SYSTEMATIC INSTRUCTIONAL DECISION-MAKING. A general instructional model is described which can be used by teachers in deciding (1) which instructional activities to include in a teaching sequence and (2) whether the instructional sequence was effective. Differences between the "teacher-artist" and "teacher-technician" conception of instruction are examined.

SELECTING APPROPRIATE EDUCATIONAL OBJECTIVES. What objectives should a teacher attempt to achieve? This program provides several tools with which to answer this question. Demonstrating that more specificity of instructional goals does not insure worthwhile goals, the program develops the viewer's skills in using modified versions of the Taxonomies of Educational Objectives.

ESTABLISHING PERFORMANCE STANDARDS. This program describes concrete ways of judging the adequacy of student accomplishment. Both qualitative and quantitative techniques for assessing learner competence are illustrated, including intellectual, attitudinal, and psychomotor behavior changes. The viewer is taught (1) to distinguish between performance standards used to differentiate achievement of students and those which aid the teacher in judging his own performance and (2) to construct performance standards for objectives in a number of subject fields.

APPROPRIATE PRACTICE. One of the most important principles which can be used in selecting effective instructional sequences is to "give the learner opportunities to practice the behavior implied by the instructional objective." This program examines two forms of appropriate practice, namely, equivalent and analogous practice, and contrasts these with pre-requisite tasks and irrelevant behavior. The viewer learns to identify each of these and to generate his own appropriate practice activities.

PERCEIVED PURPOSE. This program deals with motivation or, more precisely, the necessity of having learners perceive the worth of what they are studying. Four different methods of promoting a suitable "learning set" are treated, i.e., by deduction, induction, exhortation, and extrinsic rewards. The viewer learns (1) to identify these four procedures for promoting perceived purpose and (2) to develop instructional activities incorporating each procedure. An effective "surprise" ending which concludes the program dramatizes the importance of this principle.

EVALUATION. This program treats a topic of great interest to all involved in instruction, discussing a rigorous system for assessment of teaching. Test construction, item sampling, and interpretation of student performance data are given attention and the critical role of pre-assessment of learner competency is emphasized. The viewer learns to select and test items appropriate to given objectives, to design both formal and informal pre-assessment procedures, and to make appropriate inferences regarding instruction based on data obtained from his students.

A CURRICULUM RATIONALE. Emphasizing the importance of selecting defensible objectives, this program describes the essentials of Ralph Tyler's approach to curriculum building. The viewer is given practice in employing the major components of the Tyler model.

DEFINING CONTENT FOR OBJECTIVES. In this program the application of behavioral objectives is made feasible in an ordinary classroom situation. Teachers are taught that operational objectives should specify content that is generalizable beyond a single test item. The viewer learns to identify objectives which do and do not exemplify content generality and to write objectives which do.

IDENTIFYING AFFECTIVE OBJECTIVES. Perhaps the most difficult task of those who must formulate objectives is the generation of non-cognitive, that is, affective objectives. This program provides a four step strategy for designing affective objectives and gives the viewer practice in using the strategy.

ANALYZING LEARNING OUTCOMES. In this program techniques of task analysis are applied to learning objectives. Practice is provided so that an operational objective can be analyzed into sub-tasks, designated as either entry or en route skills. Use of a particular strategy is advocated in which instruction is approached in terms of learners' response rather than teacher presentations.

KNOWLEDGE OF RESULTS. This program stresses the importance of allowing the learner to judge the adequacy of all important responses made during an instructional sequence. The viewer is given practice in discriminating between hypothetical situations in which an instructor does or does not provide knowledge of results.

TEACHING UNITS AND LESSON PLANS. This program describes recommended elements for the two most popular forms of instructional plans, that is, the teaching unit and the lesson plan. The viewer is given practice in identifying procedures which are appropriate for lesson plans, teaching units, both, or neither.

DISCIPLINE IN THE CLASSROOM. This program describes a translation of operant methods to problems of classroom control. The viewer learns to describe the basic rules of contingency management, to identify instances when operant methods are being used, and to write solutions to common classroom behavior problems according to a reinforcement paradigm.

MODERN MEASUREMENT METHODS. Two recent conceptions in educational measurement are examined in this program, namely, item sampling and criterion-referenced measurement. Their implications for diverse evaluation situations are explored. The viewer is given practice in deciding when to use these approaches.

UTILIZATION GUIDE (printed). A new addition to the Vimcet series is a printed utilization guide which offers suggestions to users regarding the manner in which certain programs can be coordinated. For example, possible sequences of programs are described for pre- and in-service teacher education courses, supervisory institutes, instructor training sessions. Follow-up activities are described along with an extensive set of relevant readings. Two positions papers are included for use in discussion sessions correlated with the programs.

Producer: Jam Handy Organization
Descriptor: Slides and filmstrips
Specific Material: 33 frames, black and white, 35mm
Running Time:
Description: Uses cartoons with a touch of humor to present study skills
Availability: Available when not in use
Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

36. Title: USING A TEXTBOOK
Producer: Jam Handy Organization
Descriptor: Slides and filmstrips
Specific Material: 27 frames, black and white, 35mm
Running Time:
Description: Uses cartoons with a touch of humor to present study skills
Availability: Available when not in use
Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

37. Title: TAKING NOTES IN CLASS
Producer: Jam Handy Organization
Descriptor: Slides and filmstrips
Specific Material: 30 frames, black and white, 35mm
Running Time:
Description: Uses cartoons with a touch of humor to present study skills
Availability: Available when not in use
Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

38. Title: BETTER STUDY HABITS - READING
Producer: McGraw-Hill Book Company
Descriptor: Slides and filmstrips
Specific Material:
Running Time:
Description: Illustrates certain important study and learning skills. Presents study as the shortest and most direct route to acquiring knowledge.
Availability: Available when not in use
Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

39. Title: BROADER CONCEPT OF METHOD. PART 1, DEVELOPING PUPIL INTEREST

Producer: McGraw-Hill Book Company

Descriptor: Slides and filmstrips

Specific Material: 33 frames, black and white, 35mm

Running Time:

Description: Presents a picture of the teacher-cominated lesson-hearing type of recitation, and shows typical effects of this method on student attitudes, responses, and learning; and compares formal recitation with the informal group-discussion type of class sessions in which students are permitted to share in the planning of their work.

Availability: Available when not in use

Special Comments: Supplements motion picture of the same title. Based on the book Student Teaching, by Raleigh Schorling

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

40. Title: EDDIE WASN'T THERE

Producer: McGraw-Hill Book Company

Descriptor: Slides and filmstrips

Specific Material: 53 frames, black and white, 35mm, with synchronized record

Running Time:

Description: Eddie takes steps to improve when he finds that his lack of concentration causes him to make mistakes at school and at play. For middle grades.

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

41. Title: LEARNING TO UNDERSTAND CHILDREN. PART 1, A DIAGNOSTIC APPROACH

Producer: McGraw-Hill Book Company

Descriptor: Slides and filmstrips

Specific Material: 37 frames, black and white, 35mm

Running Time:

Description: A case study of a maladjusted girl of 15, with a presentation of the diagnostic techniques employed by her teacher--observation of the child's behavior, study of her previous records, personal interviews, home visits, and formulation of an hypothesis for remedial measures.

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

42. *Title:* LEARNING TO UNDERSTAND CHILDREN. PART 2, A REMEDIAL PROGRAM
Producer: McGraw-Hill Book Company
Descriptor: Slides and filmstrips
Specific Material: 34 frames, black and white, 35mm
Running Time:
Description: How a maladjusted student's interest in art is used to develop her self-confidence and interest in her school work, and to win recognition and acceptance by her schoolmates. Illustrated techniques of remedial procedures for many types of maladjustments.
Availability: Available when not in use
Special Comments: Supplements motion picture of the same title. Based on the book Student Teaching, by Raleigh Schorling

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

43. *Title:* MAINTAINING CLASSROOM DISCIPLINE
Producer: McGraw-Hill Book Company
Descriptor: Slides and filmstrips
Specific Material: 43 frames, black and white, 35mm
Running Time:
Description: By contrasting methods of handling the same class, explores techniques for securing class discipline and stimulating the interest of students. Presents basic principles of method which help toward productivity and mutually satisfactory class control.
Availability: Available when not in use
Special Comments: Supplements motion picture of the same title. Based on the book Student Teaching, by Raleigh Schorling

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

44. *Title:* CONFERENCE TIME FOR TEACHERS AND PARENTS; A FILMSTRIP FOR TEACHERS
Producer: National Education Association
Descriptor: Slides and filmstrips
Specific Material: 79 frames, color, sound, 35mm
Running Time:
Description:
Availability: Available when not in use
Special Comments: Based on the booklet: Conference time for teachers and parents.

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

45. Title: CONTROLLING CLASSROOM MISBEHAVIOR
Producer: National Education Association
Descriptor: Slides and filmstrips
Specific Material: 74 frames, color, 35mm and records
Running Time:
Description: Stresses that the single most important aspect in controlling classroom misbehavior is the teacher's expertise in his subject matter and his ability to present it in an interesting and relevant manner. Covers various types of control techniques, discusses the ripple effect, and gives general guidelines to follow to prevent classroom misbehavior.
Availability: Available when not in use
Special Comments: Based on Controlling classroom misbehavior, by William J. Gnagey, booklet no. 32 in the Waht research says to the teacher series.

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

46. Title: DECIDING WHAT TO TEACH
Producer: National Education Association
Descriptor: Slides and filmstrips
Specific Material: 107 frames, color filmstrip with sound, supplementary recording, script.
Running Time:
Description: Discusses four sets of problems, related to deciding what to teach--making decisions, establishing priorities, selecting content and balancing the program
Availability: Available when not in use
Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

47. Title: EDUCATIONAL MEDIA
Producer: National Education Association of Classroom Teachers
Descriptor: Slides and filmstrips
Specific Material: 93 frames, color, 35mm and record
Running Time:
Description: Surveys media now available, and discusses the considerations involved in selecting and testing them. Examines what constitutes an effective environment for the integration of media in the teaching process and which media lend themselves best to teaching information.
Availability:
Special Comments: With guide and script. Based on Educational Media, by Gerald M. Torkelson.

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

48. Title: EVERY TEACHER

Producer: National Education Association

Descriptor: Slides and filmstrip

Specific Material: 73 frames, color, 35mm

Running Time:

Description: Discusses teachers' rights to participate in politics

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

49. Title: GUIDELINES FOR DECISION ON ISSUES IN ELEMENTARY EDUCATION

Producer: National Education Association

Descriptor: Slides and filmstrips

Specific Material: 134 frames, color, 35mm, sound filmstrip, audio-tape

Running Time:

Description: Presents guidelines for decision on the issues in elementary education, for use at the 1961 annual meeting of the Department of Elementary School Principals, National Education Association.

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian
St. John College Library
771-2388, Ext. 239

50. Title: MOTIVATION IN TEACHING AND LEARNING

Producer: National Education Association

Descriptor: Slides and filmstrips

Specific Material: 72 frames, color, 35mm, with record

Running Time:

Description: Summarizes the implications of recent research in the field of motivation in teaching and learning. Presents methods concerning how to motivate more students to learn. Discusses the part the teacher's personal characteristics play; how students attitudes aspirations, and self-concepts affect motivation; and how the student's record of success and failure affects his motivation.

Availability: Available when not in use

Special Comments: Based on Motivation in teaching and learning by Don E. Hamachek

Contact: Mary Jo Magner, Librarian
St. John College Library

51. *Title:* NURSERY SCHOOL AND KINDERGARTEN EDUCATION

Producer: National Education Association

Descriptor: Slides and filmstrips

Specific Material:

Running Time:

Description:

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian

St. John College Library

771-2388, Ext. 239

52. *Title:* PLANNING AND ORGANIZING FOR TEACHING

Producer: National Education Association

Descriptor: Slides and filmstrips

Specific Material: 110 frames, color, 35mm with record

Running Time:

Description: Reviews four considerations preliminary to teaching -- organizing the curriculum, organizing the school and the classroom and organizing materials, technology and space, and using research, experimentation and innovation.

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian

St. John College Library

771-2388, Ext. 239

53. *Title:* TEACHING THE DISADVANTAGED

Producer: National Education Association

Descriptor: Slides and filmstrips

Specific Material: 52 frames, color, 35mm with record

Running Time:

Description: Describes the characteristics of disadvantaged children and discusses their learning handicaps. Contrasts in teaching methods by which they may be reached with those which are ineffective, and points out some of the problems of each age group.

Availability: Available when not in use

Special Comments:

Contact: Mary Jo Magner, Librarian

St. John College Library

771-2388, Ext. 239

54. *Title:* BROADER CONCEPT OF METHOD. PART 2. TEACHER AND PUPILS
PLANNING AND WORKING TOGETHER

Producer: McGraw-Hill Book Company

Descriptor: Slides and filmstrips

Specific Material: 37 frames, black and white, 35mm

Running Time:

Description: Shows the activities of students who are learning to work together, to organize themselves into functional groups, to make and carry out plans for investigation, to present their findings and recommendations in a report, and to put into practice their findings and recommendations. Indicates how the teacher can provide tactful guidance in the solution of difficulties.

Availability: Available when not in use

Special Comments: Supplements motion picture of the same title.
Based on the book Student Teaching, by Raleigh Schorling.

55. *Title:* READING SERIES - WORDS AND WORD GROUPS

Producer: Society for Visual Education

Descriptor: Slides and filmstrips

Specific Material: 6 filmstrips for Words; 4 for word groups

Running Time:

Description: Filmstrips for use with Tachistoscope

Availability: Available when not in use

Special Comments:

Contact: Miss Sandy Dolechek
Department of Education
Baldwin-Wallace College
826-2166

56. *Title:* READING

Producer: Los Angeles Board of Education through Jan Handy

Descriptor: Slides and filmstrips

Specific Material: Filmstrips

Running Time:

Description: Set of 15 filmstrips for the teaching of reading at the elementary level.

Availability: Available when not in use

Special Comments:

Contact: Miss Sandy Dolechek
Department of Education
Baldwin-Wallace College
826-2166

57. *Title:* STUDYING TEACHER INFLUENCE

Producer: University of Minnesota AV Ed. Service

Descriptor: Slides and Filmstrips and Tapes

Specific Material:

Running Time: 1/2 hour each.

Description: Set of 5 filmstrips and tapes. Flanders' Interaction Analysis described.

Availability: Available when not in use

Special Comments:

Contact: Ann Bell

Cleveland State University MC 233

687-3767

58. *Title:* MASTER TEACHER AT WORK

Producer: US Office of Education

Descriptor: Slides and filmstrips and 2 tapes

Specific Material:

Running Time:

Description: Orientation and In-service training of cooperating teachers in student teaching programs.

Availability: Available when not in use

Special Comments:

Contact: Ann Bell

Cleveland State University MC 233

687-3767

59. *Title:* MAKING YOUR OWN TESTS (3 FILMSTRIPS) 1. PLANNING, 2. CONSTRUCTION,

Producer: 3. ANALYSIS COOPERATIVE TEST DIVISION

Descriptor: Slides and filmstrips

Specific Material:

Running Time:

Description:

Availability: Available when not in use

Special Comments:

Contact: Ann Bell

Cleveland State University MC 233

60. Title: TEACHING WITH VISUAL MATERIALS

Producer: McGraw-Hill

Descriptor: Filmstrips

Specific Material: 8 filmstrips

Running Time: No set time

Description: Filmstrips on use of various A-V materials: bulletin boards, chalkboards, opaque, maps, posters, T-V

Availability: Available when not in use

Special Comments:

Contact: Dr. John Morford

John Carroll University

491-4331

61. Title: CHALKBOARDS AND FLANNEL BOARDS

Producer: Bailey Films

Descriptor: Filmstrips

Specific Material: 2 filmstrips (30 frames each)

Running Time: open

Description: As title implies

Availability: Available when not in use

Special Comments:

Contact: Dr. John Morford

John Carroll University

491-4331

62. Title: AASA SCHOOL BUILDINGS 1958; 1963-66; 1968-70

Producer: AASA

Descriptor: Filmstrips

Specific Material: Filmstrips and manuals (8 sets)

Running Time: No set time - 30 minutes to 1 hour

Description: 8 filmstrips and manuals on outstanding school buildings in years 1958; 1963, 1964, 1965, 1966, 1968, 1969 and 1970

Availability: Available when not in use

Special Comments:

Contact: Dr. John Morford

John Carroll University

491-4331

63. Title: PROFESSIONAL EDUCATION SERIES (6 FILMSTRIPS)

Producer: Bel-Mort Films

Descriptor: Filmstrips

Specific Material: Filmstrips

Running Time: No set time - 10 minutes to 30 minutes

Description: 6 Filmstrips

1. Explaining
2. Transfer of learning
3. Methods of teaching - overview
4. Methods of teaching - teaching types
5. Methods of teaching - quotations
6. Theories of motivation

Availability: Available when not in use

Special Comments:

12. Title: ERIC

Producer: U.S. Office of Education

Descriptor: Micro-fiche collections and readers

Specific Material: 1969 to current subscription basis

Running Time:

Description:

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the most significant and timely educational research reports. It consists of a coordinating staff in Washington, D.C., and 19 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are in integral part of the ERIC system.

Research in Education is the index to the ERIC collection and is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. Research in Education is available in most college libraries and many school district libraries.

The complete text of the ERIC reports, published on microfiche, are a monthly acquisition of the Cleveland State University Libraries. They are located in the Current Periodicals and Microform Service on the third floor, where five microfiche readers and a reader-printer are available.

ERIC documents may be used in The Cleveland State University library at East 22nd and Chester (in the new tower building) by any interested person, even though he has no direct affiliation with the university. In addition, micro-fiche may be borrowed through regular interlibrary loan channels, or hardcopy may be ordered at 10¢ per page.

FOREWORD

This document is an attempt to put into writing the rationale for and description of a computerized information system for teacher education centers. It is hoped that this document will be of use not only to individuals in Cleveland who will be implementing the system, but also to other educators across the country who are struggling with some of the same problems as faced by the Greater Cleveland Teacher Education Centers Coordinating Committee.

This system design originated because of the insistence of the members of the Greater Cleveland Teacher Education Centers Coordinating Committee that a way be found to share expertise and experiences related to centers among all of those who are participating in the teacher education center movement in Greater Cleveland. Thanks are in order to the members of the Executive Committee of the Teacher Education Centers Coordinating Committee who are Dr. Patrick Cosiano, Mr. Jerry Graham, Mr. Larry Mervine, Miss Edna Stinson, and Dr. Sally Wertheim.

Particular thanks is due to Miss Aliene Curry of St. John College who assisted the staff in gathering data from the teacher education centers in the Greater Cleveland area.

Ed Fox, Director of the Cleveland Commission on Higher Education, and the individual primarily responsible for the rapid success of the teacher education center movement in Cleveland, was also extremely helpful in the design phases of the system. Thanks are also due to Clarence Hopkins of Computer Business Management, Inc., who was able to understand so quickly the complexities of the teacher education activities in Greater Cleveland and who was able to, in a relatively short period of time, systematize our own thinking about what such an information system should look like.

I. The Teacher Education Center Movement in Greater Cleveland

With the support of the Martha Holden Jennings Foundation the Cleveland Commission on Higher Education has undertaken a three year activity to Stimulate Innovations in Teacher Education Programs in the Greater Cleveland Schools, Colleges and Universities (SITE Project). The major innovation which the SITE Project selected to stimulate in the Greater Cleveland Metropolitan area is the Teacher Education Center.

Teacher education centers are joint ventures of one or more elementary and secondary schools together with one or more colleges, and are designed to improve the student teaching phase of teacher preparation. The term "center" is somewhat of a misnomer because in this context it refers to a set of innovative activities, rather than a place. Some centers are located in several buildings, and both students and staff have experiences in each building of a center.

The distinction between the conventional approach to student teaching and the center approach may be seen in the following table:

| | <u>Problems with the conventional approach</u> | <u>The "Center" approach as a way of resolving the problems</u> |
|--|--|--|
| Assignment of Student Teachers | Scattered in many schools. | Clustered in buildings, chosen for particular experiences. |
| Supervision of Student Teachers | Individual students supervised daily by master teacher, infrequently by college faculty member (referred to as college supervisor). Minimal communication between college and school supervisors. No coordination of in-school activities. | Directly, by master teacher. Indirectly by college supervisor, through teacher. Frequently in-school program has part-time or full-time coordinator. |
| College Supervisor's Activity | "Circuit-rider" - visiting students in many locations. | Concentrated at center, available to student teachers and to all school personnel as an added resource. |
| Preparation of master-teacher for supervisory role | Varies--usually minimal. | Workshops and other efforts to incorporate master teacher into teacher training team. |
| Seminar on teaching | On campus, frequently not related to student teaching experience. | Usually at center, tied to experience in teaching. |

| | | |
|---|---|--|
| Effect on School environment | No direct effort to help school program. | A direct effort made to improve the learning environment within the school. |
| Variety of Student Teaching Experiences | Usually one classroom with one master teacher. Little opportunity to visit other classes. | Often contact with two or more classes and teaching styles; sometimes assignments are to a teaching team or to a whole department. |
| Decision-making | College dominated and imposed. | School-college partnership. |

As far as the SITE Project is concerned, the essential element which constitutes a center is a school-college partnership. The school-college partnership is manifested by the existence of a "center-team," consisting of representatives of both the school and college.

It is important to emphasize that "Center" strategy is aimed, not at increasing the number of teachers trained, but rather at improving the quality of those who are trained. College and school personnel agree that this is best done through intensive integration of instructional theory with school-based clinical teaching experience. The center concept embodies this bridging approach.

The number of Teacher Education Centers in Greater Cleveland has grown rapidly. Only 5 centers were being planned prior to the start of the SITE Project in mid 1970. By May of 1971, at the end of the first year of SITE, the number in operation grew to 17. During this current 1971-72 school year the number of centers has more than doubled to a total of 35, involving some 50 elementary and secondary schools.

These days innovative approaches in schools do not succeed without the enthusiastic support of the teachers. The rapid growth of centers would not have been possible without their support. Approximately 250 teachers are involved in centers. This is twice what it was one year ago.

The coordination of the teacher education centers movement in Greater Cleveland is achieved through a coordinating committee made up of one representative from each center. Those representatives then elect a 5 member executive committee to handle the ongoing activities of the Greater Cleveland Teacher Education Centers Coordinating Committee. The SITE Project through the Cleveland Commission on Higher Education provides a professional and secretarial staff to the Committee. The full Committee meets several times per year to set policy and monitor progress. The Executive Committee meets monthly with the staff.

It was the December 4th, 1971 meeting of the Greater Cleveland Teacher Education Centers Coordinating Committee, that prompted the development of the information system. The following quotation is from the minutes of that meeting:

There was early agreement that there is substantial diversity in teacher education centers in terms of the unique situation of school districts and colleges which result in unique teacher education centers. Further, various centers and individuals are at different levels of their own development around teacher education centers. This discussion led to the identification of the need to fully share information regarding the status of teacher education centers, their identification, membership in the Teacher Education Centers Coordinating Committee, etc.

This led to the related area of the sharing of resources. Many centers have individuals who have competence in the area of teacher education centers, whose expertise could be shared to advantage with other centers. In addition, local and national expertise and other kinds of resources could be shared on a cooperative basis. It was pointed out that some of this had been done in previous meetings and that there are many resources currently in existence in the county that we tend to overlook in our search for an outside expert.

A consultant was hired to begin to pull together the kinds of information needed. In depth interviews were conducted with college and school people involved in centers. The results of that study indicated the magnitude of the problem. It was clear that in the near future well over 1,000 individuals would be involved in teacher education center activities in Greater Cleveland. Keeping track of "who is doing what" would be a formidable job.

The interviews also strengthened belief in school/college partnerships as the way to achieve improvements in teacher education and as a way of achieving instructional improvement in the classrooms. However, the interviews also brought to light that individuals within the same school system or college frequently meant different things when they used the term "Teacher Education Center."

II. A Problem of Semantics

There is general agreement among most individuals involved in centers in the Cleveland area regarding the kinds of activities that should occur in teacher education centers. These kinds of activities are outlined on pages 1 and 2 of this document. The problem, however, occurs when it comes time to begin to count the number of centers in operation. Some individuals define a center as one school which is working with a college or university. Others define a center as a number of schools. The diverse views are illustrated in the following hypothetical example of Trafford Heights School System.

A HYPOTHETICAL CASE STUDY- The Trafford Heights School District

Trafford Heights School District consists of 7 elementary schools, 2 junior highs, and 1 senior high school. The school district works with three colleges on a partnership basis. Outside observers feel that many good things are happening in the District. Colleges and school people alike are happy with the partnership arrangements that are developing. Everyone involved in those partnership arrangements uses the term "teacher education center" to describe his activities. The 3 colleges work with 6 schools on a partnership arrangement as indicated below.

| <u>College A</u> | <u>College B</u> | <u>College C</u> |
|--------------------------------|--|--|
| Elementary #1 Elementary #2 | Elementary #3 Jr. High #1 (Social Studies & English) | Jr. High #2 (English) Sr. High #1 (Social Studies) |

The question is: How many teacher education centers does Trafford Heights have? Responses from various individuals who are involved are presented below:

Assistant Superintendent for Instruction: "We have one teacher education center in Trafford Heights. We are in full partnership with 3 colleges. I coordinate their efforts. We are truly a multi-institutional teacher education center."

Principal, Elementary #1: "We have 2 centers here in Trafford Heights. An elementary center and the secondary center. Once per month the cooperating teachers and their student teachers from all 3 elementary schools get together for a joint meeting to discuss common problems. The secondary people have similar joint sessions."

Principal, Elementary #2: "I haven't thought about it too much but I've been operating on the assumption that Elementary School #2 is a teacher education center. After all, Dr. Johnson of College A spends 2 days per week in this building and conducts weekly seminars for student teachers and faculty."

Dean, College A: "Our Trafford Heights Center is one of our first. We now use the same pattern in other centers throughout the state. We find that a center consisting of 2 medium size schools is ideal. We can then place 10-15 student teachers in each, and justify a full-time faculty member to work exclusively with those 2 schools. It also works out well for pre-student teaching experiences which we are doing much more of these days."

Dean, College B: "We are in the process of building a teacher education center in Trafford Heights. We see a center as consisting of a secondary school and its feeder elementary schools. Right now we are working with Junior High #1 and its larger feeder elementary school. We hope to add the other elementary feeder schools next year and then get into the senior high."

Dean, College C: "We have 2 centers in Trafford Heights - one in a junior high English Department and one in a senior high Social Studies Department. We did try some joint meetings of people from the 2 centers, but it did not work out very well because of the different subject areas and different grade levels. I also understand that there is some sort of communication problem between the faculty of the junior high and that of the senior high."

Thus, it is readily apparent that there are a variety of views regarding what specifically should be called a teacher education center. Regardless of whether we like the above diversity of views, such diversity represents reality.

The intent of the information system described herein is to accommodate itself to the realities of the teacher education center situation rather than try to force reality into a preconceived mold. With the implementation of the information system it is hoped that the nature of the partnership would be sufficiently illuminated so that those involved are in a position to make more rational decisions about their organizational structures and functional relationships.

III. General Description of the Information System

The purpose of the Teacher Education Centers information System is to meet the informational needs of those individuals within the centers, so that a maximum utilization of resources already available within the education community can be brought to bear on the further development of teacher education centers.

In general, the system consists of three components: (1) information gathering or input; (2) the data bank; and (3) the reports. The following diagram presents in simplified form the basic components of this information system.

Collection of Input Data. The data collection problems related to centers and the personnel involved in centers are rather difficult. It is necessary not only to obtain information about the center per se but also from the various colleges involved in the center. In addition, information needs to be gathered from individuals who are involved in centers from both the school and the college side, so that their interests and skills are used as much as possible.

The Data Bank. The Data Bank would be located at a computer facility in the Greater Cleveland area, perhaps at a college or university. It would be updated at least once per year to make sure that the data is accurate. The Data Bank serves as a source of information for the various reports generated by the information system.

Reports. Two broad categories of reports will be produced from this system.

Centers. Information will be gathered and reported for those elementary and secondary schools involved in the teacher education centers. This information on centers will be summarized in three different ways, (1) from the point of view of the schools, (2) from the point of view of the colleges and universities, and (3) from the perspective of an area-wide coordinating body. Thus the system accommodates the diverse views of centers, and turns a potentially diversive or weakening factor into a strength, through the sharing of a variety of approaches and experiences.

Personnel. Undisputedly the key resources and essential ingredients in the development of teacher education centers are the faculty and administrators from both schools and institutions of higher education. The sharing of personnel resources will be accomplished by three personnel reports, (1) a directory of personnel, in alphabetical order, similar to a faculty directory of a school or college, (2) a directory listing personnel by school or college which they are affiliated with, (3) a listing of personnel by areas of teacher education center expertise. In addition to the three reports, there will be mailing labels printed to facilitate communications among centers.

IV. Details of the Preliminary Design

1. General Systems Flow.

The following sections describes the basic system flow as presented in the schematic diagram on the pages that follow.

- a. Input - (Page 1 of the schematic diagrams). There are 4 input forms used in the system. One from the teacher education center, one from the college or university, one from the personnel involved in the center activities, and one containing external data. These input forms are turnaround documents and are described in more detail on pages 15 through 18.

The input forms are to be keypunched directly from the turnaround document and entered onto a tape through a card-to-tape program. Another program is to sort the tape by type and create 4 tapes, one each corresponding to center information, college information, personnel information, and external data.

- b. Creation and Updating of Master Tapes - (Page 1 of the schematic diagrams). The tapes containing changes (or in the case of the first run, the initial information to be entered into the system) are processed through four separate updating programs for each of four master files. Feeding into the update programs would be the input tape containing the changes referred to above, the old master tape plus an option card controlling the type of error messages and changed records to be printed. The result of the update program in each of the four cases would be to generate an updated master tape.
- c. Reports on Centers, Colleges and the Area Summary - (Page 2 of the schematic diagrams). Connectors A, B, & D indicate the updated center, college and external-data tapes are brought into a program which will generate another tape for use in printing the college reports; and it will also print out the detailed reports on departments, schools, teacher education centers, school district summaries in area summaries. Additional details of the reports are contained in pages 24 through 27. The tape for college reports would be sorted in a program and the sorted tape entered into another program which would generate reports by colleges. The college reports are described in more detail on pages 28 and 29.

- d. Personnel (Page 3 of the schematic diagrams). The Personnel Master Tape is taken into 4 different programs. First, to a print program which would generate mailing labels. This would include a parameter card which would indicate to the program which labels to print. The second would be a print program which would produce a name and address directory. The third would be a program to sort the tape by college and school and print the names within college and school sequence; and the fourth would sort the tape by area of expertise and print names within expertise categories. Sample formats for these reports can be found on pages 30 through 32.

2. Input Forms.

Preliminary input forms are shown on the following pages and are briefly described below:

- a. Center Turnaround Document - The center turnaround document would be sent to center coordinators to be filled out for each school or department in their center. In other words, if a center coordinator worked with one elementary school and two departments in a secondary school, he would fill out three documents.

The documents obtain the name and address of the school, school district principal, the contact within the building, and the name of the center coordinator. In some cases the names would be the same; in others all three will be different. Data would also be obtained regarding the number of pupils, the grade levels, the number of teachers, expected number of cooperating teachers for the current year, the number of pupils to be taught by student teachers during the current year.

Data regarding student teaching activities with colleges and universities would also be obtained to include the name of the college or university, the college supervisor, the actual number of student teachers placed last year, and the expected number of student teachers to be placed during the current year.

- b. The College and University Turnaround Document - The college and university turnaround document would obtain the college name, address, the name of the chief education officer and phone number as well as the total enrollment in education (in the case of freshman and sophomores this would be an estimate), the number working in centers and the number placed in non-centers for each of four years.
- c. Personnel Turnaround Document - The personnel document would obtain name and address information on individuals and would be sent directly to the individual. Information regarding the individual's experience would be obtained as well as information regarding interests in working with the Teacher Education Centers Coordinating Committee in further development of centers in Greater Cleveland.
- d. External Data Turnaround Document - This document would contain the name of the district, the address, the name and phone number of the superintendent, and obtain by elementary and secondary schools the number of schools, the number of teachers, the number of student teachers and the number of pupils.

All of the above forms would be turnaround documents. That is, the computer will print all the information about a center, a school, a college or university, an individual or external data on the upper part of the form. These forms will then be sent to appropriate individuals for their review and correction. Corrections would be filled in the lower part of the form. To update the four data bases, only those fields which are part of the records to be changed would be keypunched. This eliminates the rekey punching of the entire record when only a small part of that record needs to be changed. A computer program will update the four data base files. During the update process a form (turnaround document) will be printed showing the correct information after the update, along with the date the record was updated last. These forms will then be filed and held until the next time the data base is to be updated and then would be mailed to the appropriate individuals for review, correction and return.

4. Reports

The main objective of this system is to allow pertinent information about teacher education centers to be assembled and distributed to all participating colleges, universities and schools. There are four distinct sets of reports forthcoming from the system.

a) Department, school, center, district, and areawide summary.

In this set of reports information is presented starting with departments, schools, centers and districts and then summarized for the metropolitan area. The system is designed to accommodate the grouping of departments, schools and centers in whatever way the district sees fit.

b) Center cluster, college or university summary.

In this set of reports information is summarized in whatever way the college would like to have it presented. Colleges and universities have the option to group their activities in whatever ways are most appropriate for them.

c) Personnel reports.

There are three types of reports on personnel forthcoming from the system. The first is an alphabetical name and address directory similar to the faculty directory of colleges and school districts. The second is a listing of personnel who are affiliated with various schools, center districts and colleges. A third report presents a listing of individuals who are interested in sharing their experiences and knowledge in certain areas of competence.

In addition to the three reports, there will be mailing labels produced in order that communications between various kinds of personnel involved in centers can be facilitated.

5. Pre-Implementation Activities

Prior to implementing the preliminary design presented in this document, additional steps need to be taken to finalize the systems design prior to programming.

Activity List - Things To Do Prior to Implementation

1. Finalize the design of the output reports.
2. Finalize the design of the data base.
 - a. School/center
 - b. college
 - c. personnel
 - d. external
3. Finalize the design of the input forms (use turnaround concept).
4. Revise flow charts as needed.
5. Identify each computer run (from flow chart).
6. Develop program specifications for each computer run.
 - a. description of program
 - b. input specification
 - c. output specification
 - d. logic specifications
7. Write and test programs.
 - a. prepare detail logic chart
 - b. review logic chart
 - c. write program
 - d. test program
 - e. systems test (all programs at one time for entire system)
8. Write necessary procedures.
 - a. System Management Procedures
 - 1) Mailing forms to be updated (Personnel, Schools & Colleges)
 - 2) Updating external data
 - 3) Reviewing completed forms and necessary follow-up
 - 4) Submitting and control of forms for keypunching
 - 5) Requesting computer runs
 - 6) Coordinating the printing and distribution of final reports
 - 7) Forms inventory
 - b. Data Processing Procedures
 - 1) Key punch
 - 2) Computer operations
 - 3) Distribution of printed output and retention of computer tapes, etc.

6. Future Additions

The system outlined in this document can be viewed as providing minimal, basic information regarding teacher education centers. A more sophisticated system would include some or all of the following features:

Student Teachers. Additional data regarding student teacher characteristics, coupled with temporary and permanent addresses would permit the monitoring of the effect of teacher education centers on performance in subsequent teaching assignments.

Pre-Student Teaching Experiences. As centers develop it is likely they will move more heavily into pre-student teaching experiences. When this occurs, information regarding these experiences could be added to the system.

Community. The system as it stands has no provisions for incorporating information regarding community characteristics. Such information would be a logical extension of data already in the system.

Pupils. A comprehensive picture of the entire center (rather than only the student teaching aspects) would have to include additional information about the pupils serviced by the center.

V. Implications for Use in other Geographic and Educational Areas

The system described herein is scheduled to be implemented during the year 1972-1973 in Greater Cleveland. This preliminary document, in addition to being of use to those in the Greater Cleveland area could also be of use to those who might be working on similar kinds of problems in other parts of the country. While it is not a finished operating system, nevertheless, it could save a substantial amount of energy and time and money of those who might be interested in modifying the system described herein for their own purposes. Examples of two uses of this document are described below:

Example #1 - Use by One Major University for Monitoring Its Teacher Education Center Activities.

While the system described herein was developed for a multi-university/multi-school district setting, the system could also be used by one institution of higher education to keep track of the development of its own teacher education centers with a variety of school districts. With relatively minor modifications the system described in this document could be modified to account for the unique operating and geographical characteristics of such a university.

Example #2 - As a Model for Information Sharing for Purposes Other than Teacher Education Centers.

Consider the following hypothetical case: A governmental funding source has provided funds to a school district located in City A for a project to individualize instruction. The conditions of the funding were that this large urban school district involve the smaller suburban districts in the innovative activities as well as involving both local colleges and universities and colleges and universities which may be geographically distant. The purpose of the plan is to improve the individualization of instruction in elementary and secondary schools.

Twelve school districts expressed interest in participating in the project with an average of 2 schools each. The City A School District plans to involve 25 of its own schools in the operation. Some of the local colleges and universities have already been working with some of the interested school districts in various activities related to individualization. In addition, under terms of the grant, funds will be made available to secure the assistance of the department of education of the State University, located in Capital City as well as consulting assistance from a prestigious institution of higher education located in the East.

The essential problem then is one of finding out exactly who is doing what, what resources are available from each of the institutions of higher education and each of the school districts, and then sharing that information for the good of all of those participating in the project. This preliminary system design would be of use as a model for designing a system to meet the needs of the individualization project. Many of the basic procedures presented herein can be followed. The input and the output forms as well as a report format would need to be modified to focus on individualization rather than teacher education centers.

Members of the Greater Cleveland Teacher Education Centers Coordinating Committee would be happy to share on a personal basis their experiences with this approach. They can be reached by contacting the chairman, Teacher Education Centers Coordinating Committee, c/o Cleveland Commission on Higher Education, 1367 East Sixth Street, Cleveland, Ohio 44114 -- Phone: Area Code 216 241-7583.

THE [slide 3] teaching profession is a large and complex endeavour. Its effectiveness is related to the quality of certain fundamental human INTER-ACTIONS [4] we call teaching-learning situations. Critics of educational institutions claim there are PROBLEMS [5] if not serious defects in some of these interrelationships. Such as the inefficiency and ineffectiveness of the student-teacher INTERACTIONS. [6] Most of us agree though that the master teacher is one who enables each student to learn the skills, KNOWLEDGE, [7] and attitudes necessary for a satisfying, functional life as an individual ... and as a contributing member of our multi-cultural society. But, MASTER TEACHERS [8] are not usually self-generating... they are the products of long-term, comprehensive, professional development which is achieved only through effective partnership between schools and COLLEGES. [9]

The Cleveland Commission on Higher Education and The Cuyahoga County School Superintendents' Association took an initial step toward the development of a true partnership in teacher education. In 1964, with a grant from the Martha Holden Jennings and CLEVELAND [10] Foundations, the Commission conducted a study entitled "Towa 1 Improved Teacher Education in Greater Cleveland".

Among the several specific recommendations made by the STUDY-TEAM [11] members were a number directed to improving student teaching experiences. To further explore this area, the Cleveland Commission on Higher Education ORGANIZED [12] a consortium of local schools and colleges to examine and suggest ways to strengthen student teaching programs. These initial activities known as the student teaching IMPROVEMENT [13] project, were supported by a research grant from the United States Office of EDUCATION [14]. Through this funding, a three-year program of research, innovation, and evaluation in improving teacher education was INITIATED [15]. This effort created a firm base for the cooperation among area colleges of education school systems, and communities in improving student teaching.

From such COOPERATION [16] and with the support of the Martha Holden Jennings Foundation came the SITE Project...Stimulating Innovative Teacher Education. Underlying project activities were THREE [17] basic objectives: Building bridges between colleges and schools ... ENCOURAGING [18] the use of innovations in teacher education ...AND [19] upgrading the teaching profession. Growing out of these initial SITE efforts were two CONCRETE [20] actions: A series of conferences among school and college educators to explore specific concerns in teacher education ... AND [21] the establishment of teacher education centers. These CENTERS [22] represent cooperative ventures between schools and colleges in Greater Cleveland. Through the CHANNEL [23] of the teacher education center, many educators see a direct, positive means for improving the educational experiences of the student teacher, as well as effective in-service activity ... and both are directed toward improving learning in PUPILS [24].

But . . . What is a Teacher Education Center? Toward the end of the Student Teacher Improvement Project, those involved realized that the establishment of teacher education CENTERS [25] in Cleveland could best be accomplished through a metropolitan-wide cooperative relationship between schools and colleges. This perspective came at a time when the teacher education CONCEPT [26] was being recognized on the national level by the Association of Teacher Educators, The American Association of Colleges for Teacher Education, and the United States Office of Education. In 1970 [27], Dr. Raymond A. LeGrand produced an initial working paper on a Conceptual Model for Teacher Education Centers in Cleveland. This paper listed several center CHARACTERISTICS [28] ... organizing laboratory experiences at the pre-service and student teaching level to utilize the competencies of both school and college PERSONNEL [29] ... promoting inter-institutional cooperation in training teachers at both the pre-service and in-service STAGES [30] ...encouraging a diversity of innovative approaches contributing to the educational needs of the STUDENTS [31] being served ... creating environments to end the separation between colleges and schools in providing for the growth of professionals in each AREA [32] sharing responsibilities and concerns through cooperative decision-making and use of RESOURCES [33] ... and improving the instructional process by introducing new and improved approaches in the classroom through pre-service and in-service programs for TEACHERS [34]. Rather than being complete, these objectives served as starting points or initial guidelines and formed the basis for schools and colleges to begin to transform their conventional student teaching activities by incorporating some of the characteristics of centers.

In 1970 and 1971, FIVE [35] modest planning grants were made to various pairings of schools and colleges who pledged to enter into serious partnership negotiations. Simultaneously a number of unfunded PAIRINGS [36] also developed.

Some 30 such innovative approaches are now developing in the Greater Cleveland area. The CENTERS [37] are characterized by a variety and a diversity in their organization and operation, INCLUDING [38] the basic decision-making process, the educational EXPERIENCES [39] offered the student teachers, and the SPECIFIC [40] use of all center personnel. This diversity is a major STRENGTH [41] of the centers in Cleveland. Indeed, during the early development of the centers, each assumed different configurations to better serve the needs of the cooperating schools and colleges. In order to EXCHANGE [42] information and share experiences among the various centers, a committee was formed with one member from each center... thus, effective communication among the Cleveland centers was INSTITUTED [43]. Through this exchange of information and resources, several center commonalities began to emerge from the seemingly DIVERSE [44] centers ... a cooperation between colleges and schools to provide the best educational experiences and EXPERTISE [45] to students ... an internal decision-making process which permits the participation of all center PERSONNEL [46]. A team concept in which the student teachers can learn from, and share experiences with, each OTHER [47]. An emphasis on seeking innovative experiences for the student TEACHER [48]. A physical location ... perhaps an entire school or several schools ... serving as a nucleus and conceptual focal point for the center activities ... AND [49] a center coordinator. He assumes a crucial role in the teacher education center by DETERMINING [50] and seeking to fulfill the educational in-service needs of the center teachers ... AND [51] maintaining the validity of the student-teacher/practicing teacher EXPERIENCE [52].

The teacher education center's coordinating committee has further identified common NEEDS [53] in the areas of training ... information and resource sharing ...

and feedback and evaluation. To accommodate these needs, the committee is coordinating the DESIGN [54] of a training support system which focuses on pre-service and in-service training, and which includes the orientation of school administrators and college FACULTIES [55]... A resource identification and sharing system to permit the maximum utilization of human and other resources ... AND [56] a feedback system to permit the monitoring of student teacher and cooperating personnel attitudes, expectations, and experiences in the CENTERS [57]. Central staff support and outside financial assistance would be withdrawn as these supporting systems become OPERATIONAL [58].

It is expected that more teacher education centers will be added to this Greater Cleveland NETWORK [59]. Each would represent a genuine partnership between schools and colleges for ongoing professional education personnel DEVELOPMENT [60]. Through all of the apparent diversity of the various teacher education centers, there is a basic unifying GOAL [61] ... the willingness to COOPERATE [62] and use innovative APPROACHES [63] to improve the quality of teacher education.

(Slides 64-68 Credits)

APPENDIX E

COMPUTER-BASED FEEDBACK QUESTIONNAIRE SYSTEM

A Summary Commentary on the 1971-72 Feedback Data is included below followed by examples of the reports. Copies of preliminary revisions of four questionnaires which have been subsequently revised and are now being printed for 1972-73 are also included.

III. An Evaluation of Greater Cleveland Teacher Education Centers

by

Dr. Rae Rohfeld

Introduction

In March, 1972 the Teacher Education Centers Coordinating Committee, associated with the Cleveland Commission on Higher Education, conducted a questionnaire study of student teachers, cooperating teachers and Teacher Education Center Coordinators in 17 Greater Cleveland centers. For most centers, this was the second year of operation. The purpose of the study was both to assess the current quality of teacher education in the centers and to test and refine some tools to be used for yearly evaluation of the centers. From the earliest period of the center movement one of the concerns has been the necessity of developing an evaluation system. This report will analyze the composite data on centers obtained through the questionnaires, and discuss the implications of the data in both areas of concern: the teacher education process and the center evaluation process.

Separate questionnaires were sent to center coordinators, cooperating teachers, and student teachers. They were returned by 17 coordinators, 116 cooperating teachers, and 94 student teachers.

The Teacher Education Process

A. The Development of TEC Characteristics

Do we really have Teacher Education Centers? A number of questions relate to the extent to which the student teaching environments are becoming actual teacher education centers. The data casts light on five TEC characteristics.

1. School-college partnership in teacher education

The partnership approach is central to the concept of a teacher education center, and shared decision-making might be viewed as the essence of such a partnership. In response to question 11 in the coordinators' questionnaire, 70.6% reported that the college or university and school have a mechanism for cooperatively determining general policy. Only 25% of those responding "yes" think the mechanism is extremely useful; the remainder find it "somewhat useful."

In regard to specific decisions, 58.8% of the coordinators report that they assign student teachers to cooperating teachers,¹ either on their own or in cooperation with others, and 53% report that cooperating teachers were chosen either by center coordinators or jointly by school and college personnel.² 69% of the cooperating teachers said expectations of them were jointly determined by school and college.³ Since the center coordinators theoretically represent the school and college jointly, their responsibilities, decisions, and activities may be regarded as representing the partnership. (This assumption might be limited somewhat by the fact that 53% of the coordinators are paid entirely by the colleges and only 11.8% clearly indicate shared contributions to their salaries).⁴ On the other hand, when we come to coordinator's question 18,

"Who makes decisions about student teaching?" only 35.3% report the decisions are shared equally; 35.3% state the college, mainly, makes them, and 23.5% say the school personnel are mainly responsible.

It appears that the centers could profitably examine the issue of the school-college (or university) partnership, focussing on the question, "What is the nature of the teacher education partnership?"

2. Breadth and Variety of Experience

The main information on breadth and variety of training experience comes from questions 7 and 27 - 30 in the student teacher questionnaire which deal with the number and grade levels of teachers with whom student teachers have contact. 42.6% of the students indicate that only one teacher helps them; 33% report two help them. Still, 60.7% of the students say they work with other teachers frequently or very frequently. The work is almost always on one grade level, however, for only 27.7% say they work with other grade levels frequently or very frequently. The responses show only a little more variety when it comes to studying other experiences--59% say they study other teachers frequently or very frequently, but only 33% study other grade levels as often. Perhaps as a result of this limited exposure, 83% of the student teachers want to teach the same age group when they get jobs.⁵

3. Clustering students to build a community

A center is envisioned as an environment in which enough students may be grouped to 1) provide peer group support and sharing, and 2) to warrant the full time commitment of a college faculty member. Among center coordinators, 53% report centers training 6-10 students per term, and 35% report centers training 1-5 students per term. Only 11.8% (2 centers out of 17) had more than 10 student teachers per term.⁶ Centers might wish to consider what the optimal size is for meeting their goals.

4. Roles of center staff members

In the center concept one expects college faculty members to view themselves as trainers of trainers, working through cooperating teachers to train student teachers. Cooperating teachers should in turn view themselves as teacher trainers. The survey did not question subjects about their role perceptions, but their activities and training has some bearing on identifying the respective roles. Among center coordinators, 64.7% have had no training for the coordinator's position; of those who have had training, 50% found it extremely helpful and 33.3% found it somewhat helpful.⁷ 53% of the coordinators report that they plan and implement the in-service programs in the school related to student teaching, and 82% say they hold seminars for cooperating teachers.⁸ What occurs in these sessions is not clear, however, for 63.8% of the cooperating teachers say they were not trained for supervision,⁹ and 26.7% of the cooperating teachers suggest training for cooperating teachers as the most effective contribution universities could make to help them be more effective professionals.¹⁰ While many felt a need for training, 51% of the

cooperating teachers either could not say what they were unprepared for or did not feel they were unprepared for any aspect of their responsibility to student teachers,¹¹ and 69.1% of the student teachers thought their cooperating teachers were extremely competent with them.¹²

5. Teacher education continuum

A strong point of the center concept is that it can provide an environment for teacher education from pre-student teaching field work through student teaching to in-service education for professional teachers and administrators. The questionnaires did not deal with pre-student teaching activities, but the number of times the need for earlier field experience was mentioned indicates that most centers do not focus on these activities. On the other end of the continuum, 41% of the coordinators say they provide in-service not related to student teaching¹³ but in responding to what major thing the colleges could do to help the coordinators be more effective, the suggestion they made most often (23.5%) was "provide more meaningful inservice".¹⁴ The same suggestion was made by 10.3% of the cooperating teachers, and represented their second-highest choice, after training as cooperating teachers.¹⁵ The ability to utilize the teacher education center for training at all levels may depend to a great extent on clarification of the nature of the school-college partnership mentioned in item one.

B. The Student Teaching Experience

1. Student Teacher Satisfaction

Students overwhelmingly liked their student-teaching experience, with 66% answering they "definitely" liked it, and 25% answering "somewhat".¹⁶ What they liked best about it was their cooperating teacher; this was offered as the best liked aspect by 37% of the respondees.¹⁷ They found the cooperating teacher to be extremely helpful (72.3%), extremely competent in teaching (75.5) and extremely competent with the student teacher (69.1%).¹⁸ 92.6% felt that the amount of responsibility given to them was just about right.¹⁹ As one would expect, the need for more training for cooperating teachers was felt by the cooperating teachers themselves or by the center coordinators, but never suggested by the students.

2. Coordinators' time commitment

In operating the centers, 35.3% of the coordinators report spending up to 20% of their time on duties related to student teachers and/or cooperating teachers, and another 35.3% of the coordinators report spending 20 to 40% of their time on these duties.¹⁹ Coordinators tend to see this time as insufficient, for, when asked what one thing the school could do to help them be more effective, 23.5% answered that it could provide more release time, and 17.6% said that it could provide more time to work with student teachers

and cooperating teachers.²⁰

3. The Field Experience Component

One change which all three groups agreed on was the need for more and better field experience to start earlier in the students' education. As one student put it, "Student teachers [should] be more prepared in practical matters before stepping into the classroom".²¹ A cooperating teacher thought earlier classroom exposure was important because, "a student should be in the position earlier in his schooling to determine if teaching is what he truly wants and can do. ..." ²² Testing one's interest and developing more practical competence were commonly cited reasons for wanting earlier field experience. Earlier field experience is also supported by students' responses on the utility of their education courses. 36.2% said the courses were somewhat helpful, 21.3% were neutral about them, and only 14.9% found them extremely helpful.²³ On the other hand, after entering student teaching, 61.7% of the students found the content of the education courses more meaningful.²⁴ This result indicates that the field experiences and methods courses reinforce each other. Bringing them into a closer relationship might increase the satisfaction with the total teacher education process.

4. Competence in student teaching

At the start of student teaching, 39.7% of the cooperating teachers found their student teachers very well prepared; 23.3% thought they were somewhat well prepared, and 22.4% gave a neutral response.²⁵ While 95.7% of the students felt competent in content²⁶ only 31% of the cooperating teachers found them extremely knowledgeable in subject matter, and 52.6% found them somewhat competent.²⁷ In relating to kids, 43.1% of the cooperating teachers found their students extremely good and 34.5% thought they did fairly well.²⁸ They saw them relating slightly better to adults, with 49.1% responding "extremely well" and 34.5% "fairly well."²⁹ These responses may relate to the above considerations concerning prior preparation, and the positive responses might be increased by earlier field experience and counselling of education majors.

5. Seminars

The seminar is required with student teaching but while 66% of the students definitely liked student teaching, only 6.4% found the seminars extremely useful, and only 22% felt they were able to share experiences heavily with other student teachers. 50% felt they shared experiences a moderate amount, and 27% felt they had no opportunity to share experiences. 59.6% thought the seminar somewhat useful, and 33% said it was not at all useful.³⁰ In other words, in regard to both sharing opportunities and utility, the number of students reporting no benefit exceeded the number reporting heavy benefits.

The individual center data gives some indication that on-site seminars are more successful than seminars at the college--possibly because the on-site seminars involve students at only one location and can focus more directly on a shared experience. On the other hand, there is a good deal of variation in responses among the different on-site seminars.

6. Effect of Student Teaching Experience

By and large the student teaching experience tends to confirm or intensify prior expectations. 69.1% of the student teachers found the schools as they expected,³¹ and their concept of kids unchanged.³² Largest changes came in the student teachers' concepts of themselves, where 30.9% found themselves more confident,³³ and in the concept of teaching, where 25.5% found it more demanding³⁴ than they had expected. Cooperating teachers were also confirmed in their educational philosophies. 16.4% did not respond to the question on how their philosophies had changed, 45.7% said there was no change, and 12.1% thought the experience with student teachers had broadened their philosophies.³⁵

C. Meeting Professional and Community Needs

1. The Communities receiving new teachers.

The Teacher Education Centers studied are preparing students to teach in suburban schools. 76.6% of the student teachers are in suburban schools, 13.8% in urban schools, and 5.3% in inner city schools.³⁶ These are much like the elementary and secondary schools they attended: 55.3% went to suburban schools and 25.5% went to urban, non-inner city schools.³⁷ The students wish to stay in similar schools: 55.3% prefer suburban teaching jobs, 16% prefer urban, non-inner-city jobs, and only 4.3% seek inner-city teaching positions.³⁸ Both the students and their cooperating teachers consider the new teachers best prepared for suburban schools and then, in order, they are prepared for urban, rural, and inner city situations. Cooperating teachers find fewer students "very well prepared" than students report in every category.³⁹

The largest number of students (37.2%) chose their schools because they were convenient and they liked them. 30.9% had no choice.⁴⁰ Only a few chose the school because of a training goal, such as wanting an open school. A few students wanted a particular cooperating teacher. One did choose an inner-city school because he wanted that experience, and another chose the only school approved of by the university that had majority black student population.⁴¹ If needs for non-suburban schools are going to be met, the students will obviously require a heavy amount of planned exposure to inner-city and rural schools and encouragement to take student teaching in such schools.

2. Community Relations

Despite increasing interest in community schools and community participation in the schools, only 18% of the student teachers are extremely aware of community resources, and 22% are not at all aware.⁴² This contrasts markedly with the 50% who are extremely familiar with resources in their schools.⁴³ This suggests the need for further exploration of school-community relationships within the teacher education process.

D. Implications for Action

1. Center staffs (coordinator, cooperating teachers, and related school and college personnel) should define more clearly the Teacher Education Center model they are working toward. They should consider particularly the nature of the partnership they desire, the respective roles of center staff members, and the optimal size of the center. The Cleveland Commission on Higher Education could support this effort by providing resources--written or personal--on alternative models and their implications.
2. Considerable attention and planning should be given to starting significant classroom experiences as early as the freshman year. Methods courses should be revised and correlated with the field experience. These field experiences could provide a basis for students to choose student teaching assignments with more consideration of their personal learning goals instead of depending on less educationally significant criteria, such as convenience.
3. In as much as the student teaching experience appears to set expectations and preferences, consideration should be given to expanding student teacher experiences in regard to grade levels, teaching styles, and learning environments. Special efforts should be made to develop centers with inner-city schools. The Cleveland Commission on Higher Education could help seek inner-city sites and help establish school-college relationships.
4. Centers should reexamine their seminars and find ways to relate them to student teacher needs. One approach which they should consider are on-site seminars planned by the student teachers.
5. Means should be developed to involve community people in the center and to involve student teachers in the community--at least to the extent that the students can use community resources in their teaching.

The Center Evaluation Process

A. The Questionnaires

Some changes in the questionnaires would clarify the meaning of questions, simplify tabulation, and assure that the tabulations accurately reflect the individual answers.

The following general principles should guide revision of the three questionnaires:

1. The center concept should be reflected in questions and in answer choices. Many questions force distinctions between school and college or university without providing for "center" as an alternative. Also, some of the questions are difficult for centers where students and cooperating teachers are in other than a 1:1 relationship.
2. In questions where answers fall on a scale, the scale should be revised from a point on a line to a choice of words which will be maintained in the tabulation.
3. Open-ended questions should be avoided as much as possible, since the information they provide is difficult to group and utilize for purposes of improving teacher education. While open-ended questions might be justified in the first questionnaire in order to establish a list of meaningful choices, future questionnaires should be designed to force choices. Open-ended questions could continue to be used when new questions are being tested as additions to the questionnaire; the following year the new question would be incorporated as a forced choice question with the selection of the choices coming, at least partly, from the previous year's answers.
4. The next questionnaires might well reflect the view of one student teacher who said, "Terms such as 'kids' and 'flunky' don't sound very good."

An appropriate role for the Cleveland Commission on Higher Education would be to revise the questionnaires yearly, with the advice of The Teacher Education Centers Coordinating Committee. In addition, the Commission should distribute the questionnaires, when directed by the TECCC; evaluate the collective data; and circulate the tabulations and over-all evaluation report.

2. Center Evaluation of the Data

Each center must feel confident of its goals,--of the model it has set for itself--in order to have criteria by which to judge the data provided by the questionnaires. This is another reason for individual centers to spend some time focusing on self-definition. Where discrepancies between goals and reality occur, the center needs to find means to bring them closer together. Before the staff can decide on a plan of action, more information may be necessary. Part of the analysis, therefore, involves determining what further information the individual center needs and how it should obtain that information.

Most of the data will not be useful for program improvement until the center personnel can answer the questions, "What does it mean?" or "Why is it this way?" as well as, "Is this what we want to happen?" For example, why do most student teachers want to continue teaching in schools and grades similar to those of their student teaching experience? Is it because they chose their student-teaching experience based on strong knowledge of themselves and the schools, or is it because their student-teaching class is all they know? Or, to take another example, is it desirable that, for many students, their concept of themselves did not change during student teaching? Were they so well-aware of themselves before, or did they simply not receive any help toward increasing self-knowledge. Likewise, is it a strength or a weakness that the educational philosophies of cooperating teachers did not change as a result of working with a student teacher? A desirable outcome in the data cannot be accepted at face value; it is truly desirable only if it is the product of underlying conditions desired by the center.

Once the center identifies necessary changes, it enters into a new program planning phase. It might wish to go beyond its current personnel for help in program improvement. For instance, if the problem involves how to make the seminar more useful, past or present students should help plan improvements. Perhaps the students should run the seminar, or at least participate in its organization. If the center wants to work on its relationships with the community, then community people should participate in program planning. Thus regular evaluation becomes a recurring phase in the process of center development.

In order to assist centers in using their evaluation data for development purposes, the Cleveland Commission on Higher Education could sponsor workshops on the analysis and interpretation of such data. The workshops could utilize case studies from other situations and simulations of decision-making based on survey data to help the participants sharpen their evaluation skills. At least two people from each center should participate in such a workshop. They might then conduct a similar workshop for their own center members.

As centers change and improve their programs, they will, in turn, need to ask new questions in their surveys. Thus, having a means for regularly revising the questionnaire takes on added importance.

Conclusion:

The 1972 Survey of Teacher Education Centers in Greater Cleveland tested a method of evaluation which, after some adjustments are made, and after an evaluation plan is completed, can function on a regular basis with a small amount of professional support from the Cleveland Commission on Higher Education. The survey also pinpointed areas within teacher education which require attention and improvement. While each center must attend to these in accordance with its own image and goals, the Teacher Education Centers Coordinating Committee and the Cleveland Commission on Higher Education can provide means for exchanging experiences and resources and for bringing in expertise related to the concerns of both small groups of centers and the total center movement in Greater Cleveland.

Coordinator Questionnaire

DIRECTIONS: Complete as soon as possible after receipt and return to
Questionnaire Project, Cleveland Commission on Higher Education,
1367 E. 6th Street, Cleveland, Ohio 44114.

1. How many student teachers are you responsible for per term? _____
2. How many cooperating teachers are you responsible for per term? _____
3. Have you had any course work, workshop or formal training on being a coordinator? ☐ YES ☐ NO
If yes; How would you rate the usefulness of the training?
☐ Extremely helpful
☐ Somewhat helpful
☐ Not at all helpful
4. What percentage of your time is spent on duties related to student teachers and/or cooperating teachers?
☐ 0 - 20%
☐ 20 - 40%
☐ 40 - 60%
☐ 60 - 80%
☐ 80 - 100%
5. Do you engage in any of the following teacher training activities?

| | YES | NO |
|--|--------------------------|--------------------------|
| a. Teach any courses at a college or university | <input type="checkbox"/> | <input type="checkbox"/> |
| b. <u>Plan</u> the in-service programs in your school related to student teaching | <input type="checkbox"/> | <input type="checkbox"/> |
| c. <u>Implement</u> the in-service programs in your school related to student teaching | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Hold seminars for student teachers | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Hold seminars for cooperating teachers | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Provide in-service training not related to student teaching | <input type="checkbox"/> | <input type="checkbox"/> |
6. Have you suggested changes in the teacher preparation system?
☐ YES ☐ NO If yes; What was the response?

7. What changes in the teacher preparation system, would you make if you could?

8. Is your supervisory work part of graduate studies or some other program for which you are not paid. () YES () NO If No, by whom are you paid for your services?
College or universities _____ %
School District _____ %
9. Do you assign student teachers to cooperating teachers?
() YES () NO If not; Who does _____
10. Were others expectations of you made clear before you began?
() YES () NO
11. Do the college or university and the school have a mechanism for cooperatively determining general policy?
() YES () NO If yes; To what extent is it useful.
() Extremely useful
() Somewhat useful
() Not at all useful
12. How were cooperating teachers chosen, and by whom? _____
13. Which colleges or universities send student teachers to you?
1. _____
2. _____
3. _____
14. What one major thing could the colleges or universities do to help you be more effective in your job?

15. What one major thing could your school do to help you be more effective in your job?

16. What one major thing could you do to help you be more effective in your job?

17. What type of school are you involved with?

- ☐ Rural
- ☐ Suburban
- ☐ Urban (other than inner city)
- ☐ Inner city

18. Who makes the decisions about student teaching?

- ☐ Mainly by college or university?
 - ☐ Mainly by school personnel?
 - ☐ Shared approximately equally?
- If shared describe how this is accomplished. _____

19. Does your school have a joint college or university/school district committee? ☐ YES ☐ NO

20. Comments about this questionnaire or items on it. Include questions which should have been asked.

TABULATION OF RESPONSES TO
THE
STUDENT TEACHERS SURVEY - SPRING 1972

Conducted By The
TEACHER EDUCATION CENTERS COORDINATING COMMITTEE

As part of the SITE Project

Funded by a Grant from the

MARTHA HOLDEN JENNINGS FOUNDATION

In March of 1972 the Teacher Education Centers Coordinating Committee conducted a questionnaire study of student teachers and cooperating teachers from teacher education centers operating in the Greater Cleveland area. Verbatim responses are available in a separate report. This report presents the tabulation of responses from student teachers. Responses from cooperating teachers are available in a separate report.

TABULATION OF RESPONSES TO

THE

COOPERATING TEACHERS SURVEY - SPRING 1972

Conducted By The
TEACHER EDUCATION CENTERS COORDINATING COMMITTEE

As part of the SITE Project

Funded by a Grant from the

MARTHA HOLDEN JENNINGS FOUNDATION

In March of 1972 the Teacher Education Centers Coordinating Committee conducted a questionnaire study of student teachers and cooperating teachers from teacher education centers operating in the Greater Cleveland area. Verbatim responses are available in a separate report. This report presents the tabulation of responses from cooperating teachers. Responses from Student Teachers are available in a separate report.

DRAFT

Greater Cleveland Teacher Education Centers
Coordinating Committee

STUDENT TEACHER QUESTIONNAIRE

Dear Student Teacher Respondent:

As part of its efforts to support the further development of a network of outstanding teacher education centers in Greater Cleveland, the GCTEC Coordinating Committee sponsors a feedback system based on questionnaires to student teachers, cooperating teachers, center coordinators, and center-related college/university personnel. The data requested on the questionnaire addressed to you will be processed and reported in appropriate ways to protect the anonymity of all respondents. Each center and sponsoring institution will receive reports giving summaries of data pertaining to their respective spheres of activity and total summaries of metropolitan-wide data. These data will be available for local center evaluation and planning. Your candid responses are solicited. Your graciousness in responding immediately is deeply appreciated.

Please complete this form within the current week and return in the enclosed envelope to:

Cleveland Commission on Higher Education
1367 East Sixth Street
Cleveland, Ohio 44114

We sincerely appreciate your cooperation in providing data upon which plans for improved center operations can be built.

Task Force on Feedback Information System
Greater Cleveland Teacher Education Centers
Coordinating Committee

Greater Cleveland Teacher Education Centers Coordinating Committee

STUDENT TEACHER QUESTIONNAIRE

DIRECTIONS: Complete during the current week and return to: Cleveland
Commission on Higher Education, 1367 E. 6th Street,
Cleveland, Ohio 44114.

Place an "X" in the brackets which best indicate your answers.

1. How much did you benefit from your student teaching experience?

- () Extremely
- () Moderately
- () Slightly
- () Not at all

2. From which one of the following aspects of your student teaching experience did you benefit most?

- () Cooperating teacher(s)
- () Pupils
- () School environment
- () Seminars
- () Fellow student teachers
- () Other, _____

3. From which one of the following aspects of your student teaching experience did you benefit least?

- () Cooperating teacher(s)
- () Pupils
- () School environment
- () Seminars
- () Fellow student teachers
- () Other, _____

4. While doing your student teaching, did you attend seminars?

- () YES () NO (If NO, go to Question 9)

5. Where were the seminars held?

- () At student teaching site
- () At college or university
- () At another school
- () Other, _____

6. Who conducted the seminars?

- () College or university person
- () School person
- () Center coordinator
- () Other, _____

7. Check those topics below which were included in the seminars:
- ☐ Educational philosophy
 - ☐ Solving discipline problems
 - ☐ Technical and clerical problems of the student teaching itself
 - ☐ Job placement discussion
 - ☐ Review of instructional techniques
 - ☐ Evaluation of individual student teachers
 - ☐ Other, _____
8. How would you rate the usefulness of the seminars?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
9. To what extent were you able to share experiences with other student teachers?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
10. How many teachers regularly helped You?
- ☐ One
 - ☐ Two
 - ☐ Three
 - ☐ More than three
11. Did the teachers work with you as a team?
- ☐ YES
 - ☐ NO
12. How helpful was (were) the teacher(s) who worked with you?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
13. How competent was (were) your cooperating teacher(s) in his/her (their) teaching?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
14. Who was responsible for final evaluation of your work as a student teacher?
- ☐ College or university person
 - ☐ School person
 - ☐ Center coordinator
 - ☐ All of the above
 - ☐ Other, _____

15. How much feedback did you get about your student teaching performance?

- () Great deal
- () Moderate amount
- () Very little
- () None

16. To what extent was the feedback helpful to you?

- () Extremely
- () Moderately
- () Slightly
- () Not at all

17. Before you began student teaching, were you aware of the expectations for student teaching as held by - -

Extremely Moderately Slightly Not at all

| () | () | () | () | - - The cooperating teacher? |
| () | () | () | () | - - The center coordinator? |
| () | () | () | () | - - The school? |

19. Do you feel that you were unfairly used for your services while the school and university were unduly benefiting?

- () YES
- () NO

20. How do you feel about the amount of teaching responsibility you had, was it - -

- () Too much responsibility?
- () About right?
- () Too little responsibility?

21. To what extent were you involved in determining your teaching responsibilities?

- () Extensively
- () Moderately
- () Slightly
- () Not at all

22. Do you plan to be employed as a teacher in the next two years?

- () YES
- () NO

23. Did your student teaching experience change your mind about teaching?
- ☐ YES
☐ NO
24. In which area(s) do you feel you need more help before assuming full teaching responsibilities?
- ☐ Subject matter knowledge
☐ Classroom management
☐ Human relations
☐ Evaluation of pupil progress
☐ Group instructional techniques
☐ Individualized instructional techniques
☐ Other, _____
25. In what type of school setting do you feel most prepared to teach?
- ☐ Rural school
☐ Suburban school
☐ Outer city school
☐ Inner city school
26. In what type of school setting do you feel least prepared to teach?
- ☐ Rural school
☐ Suburban school
☐ Outer city school
☐ Inner city school
27. In what type of instructional setting would you feel most prepared to teach?
- ☐ Open space/pod
☐ Differentiated staffing
☐ Self-contained classroom
☐ Team teaching
28. In what type of instructional setting would you feel least prepared to teach?
- ☐ Open space/pod
☐ Differentiated staffing
☐ Self-contained classroom
☐ Team teaching
29. What do you think your chances are for obtaining a teaching job?
- ☐ Already hired
☐ Good
☐ Fair
☐ Poor
30. Did you have a choice between student teaching in the traditional placement with a single teacher and being assigned to a center?
- ☐ YES
☐ NO (If NO, skip to Question No. 33).

31. What influenced your choice?

- ☐ Pre-student teaching field experience in center
- ☐ Convenient location
- ☐ Suggestion of the college
- ☐ Desire to work more closely with other student teachers
- ☐ Particular program at the school involved
- ☐ Possible advantages of the center
- ☐ Other, _____

32. Would you choose the same center all over again?

- ☐ YES
- ☐ NO

33. Where did you have your pre-student teaching field experience?

- ☐ At this center
- ☐ At another center
- ☐ At a non-center school
- ☐ Other, _____

34. How much pre-student teaching field experience did you have?

- ☐ 60 hours or more
- ☐ 40 - 59 hours
- ☐ 20 - 39 hours
- ☐ 10 - 29 hours
- ☐ Less than 10 hours

35. To what extent did your pre-student teaching field experience help prepare you for your student teaching this term?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

36. To what extent in your student teaching experience were you able to utilize concepts and skills learned in education courses?

- ☐ Extensively
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

37. Do the experiences in your education courses have more meaning now?

- ☐ YES
- ☐ NO

38. During your student teaching, how much has your concept of a teacher's role changed?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

39. During your student teaching, how much time on the average did you spend in preparation each day?
- ☐ More than two hours
 - ☐ One - two hours
 - ☐ Less than one hour
40. To what extent did you work with teachers other than your cooperating teacher or team?
- ☐ Extensively
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
41. How helpful to you was the center coordinator?
- ☐ Extremely helpful
 - ☐ Somewhat helpful
 - ☐ Not at all helpful
42. How much contact did you have with parents of students during your student teaching experience?
- ☐ Full responsibility for parent conferences and reports of student progress
 - ☐ Shared responsibility with cooperating teacher
 - ☐ Cooperating teacher maintained parent contact
 - ☐ No parent contact involved during teaching period
43. Do you like the thought of being a teacher now more or less than before student teaching?
- ☐ More
 - ☐ About the same
 - ☐ Less
44. Do you like pupils now more or less than before student teaching?
- ☐ More
 - ☐ About the same
 - ☐ Less
46. To what extent did you become familiar with resources available in your school?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
47. To what extent did you become familiar with resources available in the community?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all

48. How would you describe the school setting where you did your student teaching?

- ☐ Rural
- ☐ Suburban
- ☐ Outer city
- ☐ Inner city

49. Was your school:

- ☐ Public?
- ☐ Private/Parochial?

50. Your student teaching was done on what level?

- ☐ High School
- ☐ Middle School/Junior High
- ☐ Upper Elementary
- ☐ Preschool/Early Elementary

51. How many other student teachers were in the same school while you were there?

- ☐ More than 20
- ☐ 10 to 20
- ☐ 5 to 10
- ☐ 0 to 5
- ☐ No others

52. What is your age?

- ☐ 20 - 21
- ☐ 22 - 23
- ☐ 24 - 25
- ☐ Over 25

53. What is (are) the name of the school(s) you did your student teaching in? _____

54. What college or university are you attending? _____

Comments about this questionnaire or items on it.

Include questions which should have been asked.

Greater Cleveland Teacher Education Centers
Coordinating Committee

COOPERATING TEACHER QUESTIONNAIRE

Dear Cooperating Teacher Respondent:

As part of its efforts to support the further development of a network of outstanding teacher education centers in Greater Cleveland, the GCTEC Coordinating Committee sponsors a feedback system based on questionnaires to student teachers, cooperating teachers, center coordinators, and center-related college/university personnel. The data requested on the questionnaire addressed to you will be processed and reported in appropriate ways to protect the anonymity of all respondents. Each center and sponsoring institution will receive reports giving summaries of data pertaining to their respective spheres of activity and total summaries of metropolitan-wide data. These data will be available for local center evaluation and planning. Your candid responses are solicited. Your graciousness in responding immediately is deeply appreciated.

Please complete this form within the current week and return in the enclosed envelope to:

Cleveland Commission on Higher Education
1367 East Sixth Street
Cleveland, Ohio 44114

We sincerely appreciate your cooperation in providing data upon which plans for improved center operations can be built.

Task Force on Feedback Information System

Coordinating Committee

Greater Cleveland Teacher Education Centers Coordinating Committee

COOPERATING TEACHER QUESTIONNAIRE

DIRECTIONS: Complete during the current week and return to: Cleveland Commission on Higher Education, 1367 E. 6th Street, Cleveland, Ohio 44114.

Place an "X" in the brackets which best indicate your answers.

1. How much did you like your experience this term as a cooperating (supervising) teacher?

20-1 () Definitely liked
2 () Liked somewhat
3 () Neutral
4 () Disliked somewhat
5 () Definitely disliked

2. What was there about your cooperating teacher experience this term that you particularly liked the most? (Choose one)

22-1 () Student teacher(s)
2 () Financial remuneration
3 () Center coordinator
4 () University supervisor
5 () Sharing teacher duties
6 () Other _____

3. What was there about your cooperating teacher experience this term that you liked the least? (Choose one)

23-1 () Student teacher(s)
2 () Amount of financial remuneration
3 () Center coordinator
4 () University supervisor
5 () Sharing teacher duties
6 () Other _____

4. How many student teachers did you work with either alone or as a part of a team during this term?

24-1 () More than 4
2 () 4
3 () 3
4 () 2
5 () 1

5. For how many student teachers this term did you have sole responsibility?

25-1 () More than 3
2 () 3
3 () 2
4 () 1
5 () 0

6. Did you work on a teaching team this term which shares supervision of student teachers?

26-1 () YES
2 () NO

7. How much prior notification did you have that you would have a student teacher this term?

27-1 () More than 2 weeks notice
2 () 1 - 2 weeks notice
3 () 1 - 5 days notice
4 () No prior notice

8. By whom were you first notified that you would have responsibility for a student teacher this term?

() A college/university person
() A school administrator
() A student teacher
() The center coordinator

9. Did you ask for a student teacher this term?

() YES
() NO

10. For how many student teachers did you have responsibility the previous term?

() More than 3
() 3
() 2
() 1
() None

11. How many college/university students in pre-student teaching field experience did you work with this term?

() More than 3
() 3
() 2
() 1
() None

12. From whom did you receive assistance relating to your role as a cooperating teacher this term? (Choose as many as applicable)

() A college/university person
() A school administrator
() The center coordinator
() Other _____
() No one

13. As a group, how do you rate the student teachers you worked with this term?

| | Outstanding | Adequate | Less than Satisfactory | |
|------|-------------|----------|------------------------|-----------------------------|
| 33-1 | () | 2 () | 3 () | Knowledge of subject matter |
| 34-1 | () | 2 () | 3 () | Ability to relate to pupils |
| 35-1 | () | 2 () | 3 () | Ability to relate to adults |

14. Before you began this term were you aware of the expectations for a cooperating teacher as held by - -

| | Extremely | Moderately | Slightly | Not at all | |
|------|-----------|------------|----------|------------|-----------------------------|
| 36-1 | () | 2 () | 3 () | 4 () | - - The college/university? |
| 37-1 | () | 2 () | 3 () | 4 () | - - The school? |
| 38-1 | () | 2 () | 3 () | () | - - The student teacher? |
| 39-1 | () | 2 () | 3 () | () | - - The center coordinator? |

15. Are you now aware of the expectations for a cooperating teacher as held by - -

| | Extremely | Moderately | Slightly | Not at all | |
|------|-----------|------------|----------|------------|-----------------------------|
| 40-1 | () | 2 () | 3 () | 4 () | - - The college/university? |
| 41-1 | () | 2 () | 3 () | 4 () | - - The school? |
| 42-1 | () | 2 () | 3 () | 4 () | - - The student teacher? |
| 43-1 | () | 2 () | 3 () | 4 () | - - The center coordinator? |

16. On the average, to what extent was (were) your student teacher(s) professionally prepared to begin student teaching?

| | | |
|------|-----|------------|
| 44-1 | () | Extremely |
| 2 | () | Moderately |
| 3 | () | Slightly |
| 4 | () | Not at all |

17. To what extent now is (are) your student teacher(s) prepared to assume the role of a regular teacher?

| | | |
|------|-----|------------|
| 45-1 | () | Extremely |
| 2 | () | Moderately |
| 3 | () | Slightly |
| 4 | () | Not at all |

18. What devices did you use to provide feedback to student teachers about their teaching behaviors? (Choose as many as applicable)

| | | |
|------|-----|-------------------|
| 46-1 | () | Checklists |
| 2 | () | Rating scales |
| 3 | () | Anecdotal reports |
| 4 | () | Conferences |
| 5 | () | Video-tape |
| 6 | () | Audio-tape |
| 7 | () | Other |

19. How are you compensated for your work with student teachers?

| YES | NO | |
|-----|-----|---------------------------|
| () | () | Released time |
| () | () | Stipend or honorarium |
| () | () | Waiver of college tuition |
| () | () | Professional growth |

20. Do you use an established schedule of experiences for student teachers?

() YES

() NO

21. How was the schedule of experiences for your student teacher decided?

() Pre-established through past experience with student teachers at your school

() Decided jointly by cooperating teacher and student teacher

() Established by the college program

() Established by the student teacher

() Other _____

22. How helpful to you was the center coordinator?

() Extremely

() Moderately

() Slightly

() Not at all

23. To what extent do you believe the pupils benefitted from having a student teacher?

() Extremely

() Moderately

() Slightly

() Not at all

24. To what extent did you benefit from having a student teacher?

() Extremely

() Moderately

() Slightly

() Not at all

25. Did you participate this term in any courses/workshops/seminars or other formal training related to your role as a cooperating teacher?

() YES

() NO (If NO, skip to Question No. 27)

26. How useful was this training?

() Extremely

() Moderately

() Slightly

() Not at all

27. Have you had any previous training as a cooperating teacher?

- ☐ YES
- ☐ NO

28. How well prepared do you feel you are for the tasks of being a cooperating teacher?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

29. In what aspect of student teacher supervision do you feel you need help the most? (Choose only one)

- ☐ Evaluating student teachers
- ☐ Subject matter knowledge
- ☐ Understanding the "youth culture"
- ☐ Demonstrating new teaching techniques
- ☐ Handling emotional problems
- ☐ Counseling on discipline problems
- ☐ Relating to education courses
- ☐ Other _____

30. What would be the most effective contribution the school or universities could make to help you be a more effective cooperating teacher? (Choose only one)

- ☐ Increased financial remuneration
- ☐ Tuition waivers for graduate courses
- ☐ Inservice help
- ☐ Sharing research results
- ☐ More released time
- ☐ Materials and equipment
- ☐ Clearer guidelines
- ☐ More effective communication
- ☐ Other _____

31. How were your student teachers this term accepted by faculty in your center?

- ☐ Extremely well accepted
- ☐ Moderately well accepted
- ☐ Simply tolerated
- ☐ Rejected

32. How were your student teachers this term accepted by pupils in your center?

- ☐ Extremely well accepted
- ☐ Moderately well accepted
- ☐ Simply tolerated
- ☐ Rejected

33. What is your age?

- ☐ Under 30
- ☐ 30 - 39
- ☐ 40 - 49
- ☐ 50 - 59
- ☐ 60 or over

34. What is the name of your school _____

35. How many years of teaching experience do you have?

- ☐ 1 - 4
- ☐ 5 - 9
- ☐ 10 - 14
- ☐ 15 - 19
- ☐ 20 or over

36. What is the highest degree you hold?

- ☐ Bachelor
- ☐ Master
- ☐ Master plus 30
- ☐ Doctorate

Comments on this questionnaire or items on it.
Include questions which should have been asked.

Cleveland, Ohio 44114.

Place an "X" in the brackets which best indicate your answers.

1. For how many student teachers were you responsible this term?

| | |
|-----|------------|
| () | 30 or over |
| () | 20-29 |
| () | 10-19 |
| () | 1- 9 |
| () | None |
2. For how many pre-student teaching persons field experiences were you responsible this term?

| | |
|-----|------------|
| () | 30 or over |
| () | 20-29 |
| () | 10-19 |
| () | 1- 9 |
| () | None |
3. How many centers did you work with (relate to) this term?

| | |
|-----|-----------------|
| () | one |
| () | two |
| () | three |
| () | more than three |
4. How many cooperating teachers did you work with (relate to) this term?

| | |
|-----|---------|
| () | Over 15 |
| () | 11-15 |
| () | 6-10 |
| () | 1- 5 |
5. What percentage of your time did you devote to activities related to teacher education centers?

| | |
|-----|---------|
| () | 0-25% |
| () | 26-50% |
| () | 51-75% |
| () | 76-100% |
6. Did you engage in any of the following teacher training activities this year?

| YES | NO | |
|-----|-----|---|
| () | () | Held seminars for cooperating teachers |
| () | () | Held seminars for coordinators |
| () | () | Held seminars for student teachers |
| () | () | Taught course(s) at a college or university |
| () | () | Planned (or helped plan) in-service programs at center(s) |
| () | () | Implemented in-service programs at center(s) |

7. How long have you been working with student teachers in your present capacity?
- ☐ Less than 1 year
 - ☐ 1-2 years
 - ☐ 2-5 years
 - ☐ Over 5 years
8. How long have you worked with teacher education center programs?
- ☐ Less than 1 year
 - ☐ 1-2 years
 - ☐ Over 2 years
9. Are you a member of a school/college mechanism such as a steering committee (or team) which makes cooperative teacher education center policy decisions?
- ☐ YES
 - ☐ NO (If NO, skip to question No. 11)
10. To what extent is this mechanism effective in developing improved center activities?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
11. In what ways are you involved in placing student teachers?
- ☐ Make recommendations to student teachers
 - ☐ Make recommendations to center
 - ☐ Assign student teachers to center(s)
 - ☐ Nominate student teachers to center(s)
 - ☐ Other, _____
12. Are you aware of center coordinators' expectations for college/university support?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
13. Are you aware of cooperating teachers' expectations for college/university support?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all
14. How effective were the center experiences of your student teacher this term?
- ☐ Extremely
 - ☐ Moderately
 - ☐ Slightly
 - ☐ Not at all

15. How did your college orient student teachers for the field experience in centers?

- ☐ Nothing special
- ☐ Special seminar or course
- ☐ Personal or small group conference
- ☐ Specific written material
- ☐ Other, _____

16. How effective was the center coordination of student teaching experiences?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

17. Do you need more help than presently available to you in any of the following aspects of your relationships to center activities?

- | YES | NO | |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | Orienting student teachers |
| <input type="checkbox"/> | <input type="checkbox"/> | Resolving personal conflicts |
| <input type="checkbox"/> | <input type="checkbox"/> | Evaluating student teacher performance |

| <input type="checkbox"/> | <input type="checkbox"/> | Planning or conducting in-service activities |
| <input type="checkbox"/> | <input type="checkbox"/> | Relating student teacher experience to educational theory |
| <input type="checkbox"/> | <input type="checkbox"/> | Other, _____ |

18. Which one thing would be the most effective contribution the school, center or college/university could make to help you improve your effectiveness with centers?

- ☐ Workshops on center programs
- ☐ Closer cooperation of school personnel
- ☐ More cooperation from other college/university personnel
- ☐ Increased financial remuneration
- ☐ Clearer guidelines
- ☐ More material and equipment
- ☐ More released time from instructional duties
- ☐ Other, _____

19. Did you participate this term in the Greater Cleveland Teacher Education Centers Coordinating Committee?

- ☐ YES
- ☐ NO (If NO, skip to Question No. 21)

20. To what degree were these experiences (or services of the committee) beneficial to you in carrying out your center-related responsibilities?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

21. What kinds of services could such a metropolitan-wide coordinating committee provide which would facilitate the center programs?

- ☐ Training for coordinators
- ☐ Training for cooperating teachers
- ☐ Training for college/university center-related personnel
- ☐ External evaluation
- ☐ Information sharing
- ☐ Consultant services for special problems
- ☐ Other, _____

22. What is your role in evaluating student teacher performance?

- ☐ Personally evaluate
- ☐ Cooperatively evaluate with center personnel
- ☐ Determine evaluation guidelines for others
- ☐ Cooperatively evaluate with other college personnel
- ☐ None
- ☐ Other, _____

23. Which one do you think benefitted the most from the center operation this term?

- ☐ Student teachers
- ☐ Cooperating teachers
- ☐ School environment
- ☐ College/university program
- ☐ College personnel

24. How well prepared do you feel for your responsibilities related to centers?

- ☐ Extremely
- ☐ Moderately
- ☐ Slightly
- ☐ Not at all

25. Were changes made this term in any of the following aspects of the undergraduate teacher education program in your institution which came about because of, or were influenced directly by, the teacher education center activities?

- | YES | NO | |
|--------------------------|--------------------------|---------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Pre-student teaching orientation |
| <input type="checkbox"/> | <input type="checkbox"/> | Content of methods courses |
| <input type="checkbox"/> | <input type="checkbox"/> | Content of educational theory courses |
| <input type="checkbox"/> | <input type="checkbox"/> | Content of subject matter courses |
| <input type="checkbox"/> | <input type="checkbox"/> | Sequence of professional courses |
| <input type="checkbox"/> | <input type="checkbox"/> | Student teaching prerequisites |
| <input type="checkbox"/> | <input type="checkbox"/> | Counselling procedures |
| <input type="checkbox"/> | <input type="checkbox"/> | Post student teaching debriefing |
| <input type="checkbox"/> | <input type="checkbox"/> | Pre-career counseling |
| <input type="checkbox"/> | <input type="checkbox"/> | Student teacher seminars |

26. With respect to decisions made about the student teaching experiences in your centers how do you feel about the way various views are taken into consideration?

- ☐ About right balance now
- ☐ College personnel should have more input
- ☐ Cooperating teachers should have more input
- ☐ Student teachers should have more input
- ☐ Center coordinators should have more input

27. What is your age?

- ☐ Under 30
- ☐ 30-39
- ☐ 40-49
- ☐ 50-59
- ☐ 60 or over

28. At what college/university are you employed? _____

29. How many years have you been in college work?

- ☐ Under 5 years
- ☐ 5-9 years
- ☐ 10-14 years
- ☐ 15 or over

30. What is your highest Degree?

- ☐ Bachelors
- ☐ Masters
- ☐ Masters & 30 Hours
- ☐ Doctorate

Comments on questions or items.
Should other questions be asked?

| 35-1 | () | 2() | Hold seminars for regular teachers |

11. By whom were you appointed to your position as coordinator?

- 36-1 () College or university only
2 () School only
3 () Both

12. By whom are you paid for your services as center coordinator?

- 37-1 () College or university only
2 () School only
3 () Both

13. How long have you served as center coordinator?

- 38-1 () Less than one year
2 () 1 - 2 years
3 () Over 2 years

14. Do the college/university and the school have a mechanism such as a steering committee for cooperatively determining policy?

- 39-1 () YES
2 () NO (If, NO, skip to Question No. 16)

15. To what extent is this mechanism useful?

- 40-1 () Extremely
 2 () Moderately
 3 () Slightly
 4 () Not at all

16. In what ways were you involved in the selection of cooperating teachers?

- 41-1 () Completely my choices
 2 () Helped with selection
 3 () Not at all

17. In what ways were you involved in selecting student teachers for the center?

- 42-1 () Interviewed Candidates
 2 () Screened list
 3 () Not at all
 4 () Other, _____

18. Are you aware of the college or university expectations for - -

Extremely Moderately Slightly Not at all

| 53-1 () | 2 () | 3 () | - - Center Program? |
| 54-1 () | 2 () | 3 () | - - Cooperating Teachers? |

21. In what type of school setting is your center?

- 55-1 () Rural
 2 () Suburban
 3 () Outer city
 4 () Inner city

22. What type(s) of student teaching experiences does your center provide?

- 56-1 () Team teaching
- 2 () Open space or pod
- 3 () Self-contained classrooms
- 4 () Other, _____

23. How did your center orient student teachers to general school policies and practices?

- 57-1 () Through individual conference with a school administrator
- 2 () Individually by cooperating teacher
- 3 () Through group seminar
- 4 () Through printed instructions
- 5 () No special orientation

24. Are you a full-time center coordinator or director?

- 58-1 () YES
- 2 () NO

25. In what aspects of center coordination do you feel you need help the most?

- 59-1 () Assigning student teachers
- 2 () Resolving personal conflicts
- 3 () Evaluation
- 4 () Conducting student teacher seminars
- 5 () Keeping abreast of research
- 6 () Clerical duties
- 7 () Providing in-service help
- 8 () Other, _____

26. What would be the most effective contribution the school or universities could make to help you be a more effective coordinator?

- 60-1 () Courses/Workshops on teacher supervision
- 2 () Closer cooperation
- 3 () Increased financial remuneration
- 4 () Clearer guidelines
- 5 () Materials and equipment
- 6 () More released time
- 7 () Other, _____

27. In what ways did the school program benefit from having student teachers in the building?

- 61-1 () Introduction of new curriculum materials
- 2 () Direct participation in program planned by center personnel
- 3 () Use of materials from data bank or college
- 4 () Participation of student teachers in integrated teams with cooperating teachers
- 5 () Other, _____

28. Did you (or another center representative) participate this term in the Greater Cleveland Teacher Education Centers Coordinating Committee?

62-1 () YES
2 () NO (If NO, skip to Question No. 30)

29. To what degree were these experiences (or services of the committee) beneficial to you in carrying out your center-related responsibilities?

63-1 () Extremely
2 () Moderately
3 () Slightly
4 () Not at all

30. What kinds of services could such a metropolitan-wide coordinating committee provide which would facilitate your center's program?

64-1 () Training for coordinators
2 () Training for cooperating teachers
3 () Training for college/university center-related personnel
4 () External evaluation
5 () Information sharing
6 () Consultant services for special problems
7 () Other, _____

31. Is there (could there be) any money available to the center to help pay for any of the above services?

65-1 () YES
2 () NO
3 () Possibly, but not sure

32. How helpful to you were the supporting efforts of the college/university personnel?

66-1 () Extremely
2 () Moderately
3 () Slightly
4 () Not at all

33. What is your age?

67- 1 () Under 30
2 () 30 - 39
3 () 40 - 49
4 () 50 - 59
5 () 60 or over

34. What is the name of your center? _____

35. How many years of professional experience do you have in education?

68-1 () Under 5 years
2 () 5 - 9 years
3 () 10 -14 years
4 () 15 -19 years
5 () 20 or over.

36. What is the highest degree you hold?

- 69-1 () Bachelor
- 2 () Master
- 3 () Master & 30 hours
- 4 () Doctorate
